PD&E STUDY PROCESS: *The PD&E Study is a formal process that the FDOT uses to ensure that consideration is given to environmental impacts, social impacts, public input, engineering design and project costs when evaluating roadway improvements.*

As the FDOT moves forward with future planning efforts, do you have any suggestions on how to make the public involvement process more effective?

PURPOSE AND NEED: *The Project Team is identifying needs for future transportation improvements in the study area.*

What do you believe are the key concerns related to the I-95 mobility and connectivity? “Mobility” refers to the movement of people and goods. “Connectivity” refers to providing a variety of ways to get from one place to another.

Moving forward, are there other transportation needs or opportunities in the study area that you believe should be considered?

AVOIDANCE AND MINIMIZATION: *The Project Team will identify any areas that may require avoidance and/or minimization of impacts during the PD&E Study.*

Moving forward, are there any important resources in the study area that should be evaluated?
