

How to Handle Multiple Displays in a Terrain File

By Denise Broom, FDOT ECSO

Q: Where can I find the video and power point for this webinar series?

A: All webinars recordings, along with any presentation and Q&A documents, can be downloaded from the ECSO website:

<http://www.dot.state.fl.us/ecso/downloads/GoToMeetingTraining/PostedWebinars.shtm#loadSection>

Q: Where can I find the Engineering / CADD Systems Office (ECSO) Training Manuals?

A: The training manuals, along with associated training data sets, can be downloaded from the ECSO website: <http://www.dot.state.fl.us/ecso/main/FDOTCaddTraining.shtm>

Q: Think of the override as a display lock.

A: Yes. Since you are in another model of the same file, you have write access to the file and the default model can be modified as a reference unless it is done as an override.

Q: Are these control features only available in SS4?

A: Yes. If you need this functionality in SS3, email ecso.support@dot.state.fl.us for assistance.
