FDOTConnect 2024.00.00.00 Initial Release

Application Changes

App Name	Files Updated	Notes
FDOTConnect2024 Applications	/Organization-Civil/	All tools and applications updated and/or recompiled for 2024 schema and compatibility
QCInspector	/Organization-Civil/FDOT/Apps/ustnQCInspector/CONNECTQCInspector.dll	Added message to not run QCProject from file within the project that is being QC'd
Workspace Doctor	/Organization-Civil/FDOT/Apps/WorkspaceDoctor/Images/Workspace Doctor.jpg /Organization-Civil/FDOT/Apps/WorkspaceDoctor/WorkspaceDoctor.exe	Minor correction Edited Version number Fix Configuration Button ToolTip Moved the Configure button Rearrange UI
Geotechnical Tools	/Organization-Civil/FDOT/Apps/GeotechnicalTools/Bentley.Interop.MicroStationDGN.dll /Organization-Civil/FDOT/Apps/GeotechnicalTools/Interop.MicroStationDGN.dll /Organization-Civil/FDOT/Apps/GeotechnicalTools/ORDGeotechnicalTools.dll /Organization-Civil/FDOT/Apps/GeotechnicalTools/ORDGeotechnicalTools.pdb	Added ability to name elements groups to be used for creating named boundaries by group instead of event point list. Fixed issue where stratum with no data input would plot boreholeid instead of empty label in cross section.
Rebar	/Organization-Civil/FDOT/Apps/Rebar/Rebar.exe	Rebar v1.35 - Changed all lettering to be capitals. Fixed bug where on creating the list of cards the program generates/stores extra empty rows. Changed SETS to SET if it's 1 and SETS if it's greater than 1.
Sign Tool	/Organization-Civil/FDOT/Apps/SignTool/FDOTORDSigns.dll	<ol style="list-style-type: none"> 1) Recompiled/Configured for ORD 2024. 2) Panel Only Labels - the panel label command will now include both payitem and station. The label options for these must be checked and the Assembly must be placed with the structure type = Panel Only. These new options will be ignored by panel label command if the structure type is not Panel Only. 3) Move panel or post with gg off was not redrawing the connector - fixed for in this build 4) PayItem number and description flip - fixed previously, but not sure you got the update. Fixed in this build. 5) Payitem does not change when post is changed - this works. Change the post or type a new payitem. Replace the panel(s) and post. Use properties to review post item type shows new payitem. 6) Refactor and Clean-up - with this build we have <ul style="list-style-type: none"> [a] made changes to the project and code to remove unused namespaces, [b] clean up unused projects (C3D is now Core and a separate solution), [c] move utilities replicated in PMT, Signals, and PBG to our FDOT Common libraries. [d] moved shared classes (between C3D and ORD) to ORD project. 7) Per recent emails from this week - evaluated Preview bug to ensure item types are attached (but not visible) on nested cells. Posted

		question to communities. I might need Michael to submit a ticket if we don't get a response by the end of the week. I don't consider this a something that should hold delivery.
