

Instructions to update your Traffic Applications

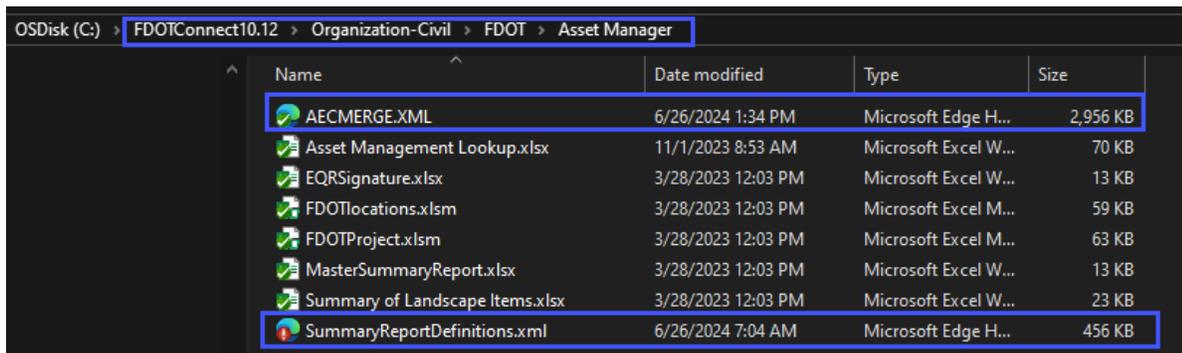

Copy and overwrite your old files with the new ones in this update. This zip file will be updated as new versions of the apps get updated in between the MR's. The zip file will contain only updated/fixed versions of the apps/files.

You may need to **right click** on the dll files and go to properties to **unblock** them before they will load in your ORD session.

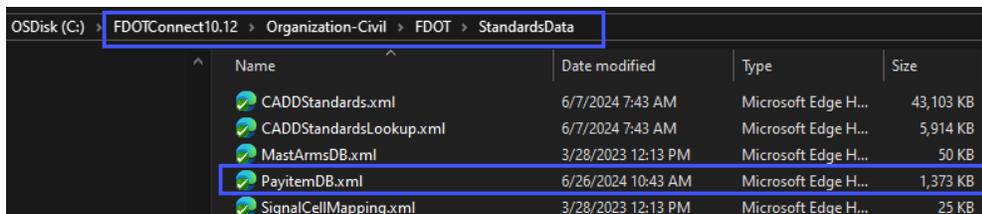

Please send an email to Randy.roberts@dot.state.fl.us to get added to the email list. When a new update is added you will be notified.

File Names, Locations, & Fixes

<u>File Name</u>	<u>Issue Addressed</u>
SummaryReportDefinitions.xml	allows 0630 2 17 & 18 to report (conduit).
PayitemDB.xml	added additional conduit to database.
AECMerge.xml	added additional conduit.
