FDOTConnect 2023 Geotech Tools Q&A – 12/12/24

Q: Does it matter using the "Borehole data sheet" or "Borehole Navigator sheet" to bring in the file under the import option for Auger?

A: The data should set that in the file, but I'll need to check.

Q: Could you edit that label option before they are placed? To make say what you want.

A: No, it's all pulled for the data.
