Georeference an Image

The following software allows you to move, rotate, and scale an image to a base map, thus making spatially aware.

ESRI ArcMap: Customize > Toolbars > Georeference

Commonly Requested Image Tools

MicroStation Inserts Incorrectly

If your image doesn't show up in the correct location, most likely the raster units are set to meters.

Go to **Workspace > Preference > Raster Manager**. Select the Georeference tab and change setting to match below.
