This map was compiled from U. S. Geological Survey quadrangle maps, Florida Dept. of Transportation aerial photography completed in 2004, General Land Office plats, inventory surveys Jan. 2005 and other available map data. This map was compiled using interactive computer graphic methodologies.

This map was prepared on the Transverse Mercator projection, 1983 North American Datum, Florida system of coordinates, East Zone.

The railroad stations on this map do not necessarily denote the presence of a depot or live facility. It may be only a point, such as a platform or siding, designated for the receipt or delivery of freight.

No attempt has been made to show all drainage canals or ditches.

All populations are taken from the 2000 United States Census. In 2000, the population of Broward County was 1,423,018. There are 1,025 square miles in the county.

No claim is made for the basic cartographic source material taken from a work or works of the United States Government.

Due to the scale of this map, the Florida Department of Transportation assumes no responsibility for inaccuracies in road alignments, configurations of intersections or other related data.

Corporate boundaries are determined using all available descriptions of the date of revision. The Florida Department of Transportation assumes no responsibility for inaccuracies in road alignments, configurations of intersections or other related data.

Maps of this series are in the public domain. The maps are compiled and published using public monies and are copyrighted to prevent reproduction and resale for profit.
