EXPLANATION OF NEW NUMBERING SYSTEM FOR STATE HIGHWAYS

ALL ROADS leading from north to south bear odd numbers with the number one assigned to the extreme easterly road. All roads leading from east to west bear even numbers with the number two assigned to the extreme northerly road.

Certain control roads have been selected for the purpose of dividing the state into segments within which an appropriate numbering plan may be effected. The north and south control roads are one and two digit numbers ending in 5 — 5-15-25-35-45-55-65-75-85-95; the east and west control roads are two digit numbers ending in zero —10-20-30-40-50-60-70-80-90.

There are four important diagonal road; two leading from northeast to southwest and two leading from northwest to southeast---- these are numbered 100-200-500-600.

Main connecting roads leading from north to south are assigned one and two digit numbers between the limiting control routes. For example, north and south main connecting roads between control routes 15 and 25 are numbered 17-19-21-23. Main connecting roads leading from east to west are assigned numbers in a similar manner. For example, east and west main connecting roads between control routes 50 and 60 are numbered 52-54-56-58.

Secondary or short length roads are assigned three digit numbers. The first numbers of the three digit number places the location with relation to the east and west control routes as follows:

Between Fla. and Ala-Ga. Line and Route 10 — Numbers 101 to 199
Between Route 10 and Route 20 — Numbers 201 to 299
Between Route 20 and Route 40 — Numbers 301 to 399
Between Route 40 and Route 50 — Numbers 401 to 499
Between Route 50 and Route 60 — Numbers 501 to 599
Between Route 60 and Route 70 — Numbers 601 to 699
Between Route 70 and Route 80 — Numbers 701 to 799
Between Route 80 and Route 90 — Numbers 801 to 899
South of Route 90 — Numbers 901 to 999

For example, Secondary Road 505 would be located between control routes 50 and 60 and would be found near the easternmost portion. Secondary Road 196 would be located between the Fla.-Ala Line and Route 10 and would be found near the westernmost portion.
