

ANGIE D. WILLIAMS

Jacksonville, FL • 904-335-2122 • AngieWH02@gmail.com • [Angie Williams | LinkedIn](#)

PROFESSIONAL SUMMARY

Senior engineering and public-infrastructure executive with more than 20 years of experience delivering complex transportation, civil, and vertical construction programs across municipal, state, and federal environments. Demonstrated expertise in contract interpretation, claims evaluation, construction oversight, and dispute resolution. Known for impartial judgment, technical rigor, and the ability to navigate high-stakes issues involving contractors, designers, and public agencies. Experienced in FDOT, FTA, FAA, and municipal procurement and construction standards.

CORE COMPETENCIES

- Construction Claims Analysis
- Contract Interpretation & Compliance
- FDOT Specifications & Procedures
- Dispute Resolution & Negotiation
- Capital Program Management
- Design-Build & CMAR Delivery
- Risk Assessment & Mitigation
- Contractor Performance Oversight
- Public Agency Governance
- Multidisciplinary Engineering Leadership

RELEVANT PROFESSIONAL EXPERIENCE

Director of U2C Programs

Jacksonville Transportation Authority (JTA)

Oversaw multimillion-dollar capital programs involving guideway construction, utility coordination, civil works, and systems integration. Led multidisciplinary teams responsible for design, construction, and operations. Ensured compliance with federal, state, and municipal construction requirements. Managed contractor performance, evaluated claims, and resolved disputes involving scope, schedule, and cost.

Senior Operations Manager

Anheuser-Busch

Directed major facility engineering projects, capital upgrades, and contractor-executed construction activities. Oversaw contract compliance, safety, and quality. Led root-cause investigations and claims reviews related to construction delays, performance issues, and change orders.

Structures Management Coordinator

Florida Department of Transportation (FDOT)

Managed structural inspections, maintenance programs, and contractor compliance for state-owned infrastructure. Coordinated with district construction, maintenance, and design teams. Interpreted FDOT specifications, evaluated contractor performance, and supported dispute resolution processes.

Mechanical Engineer

Boeing

Led engineering design, testing, and quality assurance activities in a highly regulated environment. Managed multidisciplinary teams and ensured compliance with technical specifications, safety standards, and contractual requirements.

President & Owner

Williams & Williams General Contractors

Oversaw construction operations, subcontractor management, permitting, and contract administration. Negotiated claims, resolved disputes, and ensured compliance with municipal and state construction regulations.
