Summary of Experience

Mr. Puckett was most recently employed by the Florida based consulting engineering firm of DRMP, Inc., in Orlando, Florida. He has performed constructability reviews of DRMP's in-house design plans as well as numerous FDOT projects. Additionally, he has prepared contract time analysis and work schedules for various projects. He has also assisted in preparation of the Heintzelmann Boulevard specifications and bid documents for the Greater Orlando Aviation Authority..

He has also served as the QA/QC Manager for Central Florida Expressway's (CFX) Western Expressway Part A in Orange County. Responsibilities included development and implementation of QA/QC policy; contract administration of Owner Furnished Material (OFM) contracts for precast concrete walls, piling and beams; establishment and coordination of Independent Assurance (IA) reviews; and general overview to ensure construction was performed in accordance with accepted CFX/FDOT policy.

Mr. Puckett has a successful track record in providing construction contract administration, on-site field inspection, and verification of state and federal requirements on Local Agency Projects (LAP); Transportation Regional Incentive Projects (TRIP); Economic Development Transportation Fund Projects (EDTF); and Joint Participation Agreement (JPA) Projects funded through the Federal Highway Administration (FHWA), FDOT, and City/County Public Works Departments. Having served as a Senior Project Engineer on numerous major roadway and bridge projects, his responsibilities have included contract administration; overseeing daily inspection assignments and documentation; preparation of monthly and final estimates; preparation of analysis of recommendation of request for extra time and/or cost; negotiation of extra cost; coordination and compliance assurance of environmental permits; and monitoring/updating of project work schedules.

DRB Experience

Mr. Puckett has previously served as a DRB Member on five (5) FDOT projects. These projects involved reconstruction and widening of the existing roadway, utility relocation, box culvert construction, bridge construction, pond construction, and other miscellaneous improvements.
