

THIS MEMO IS EXPIRED

August 31, 2000

MEMORANDUM NO. 26-00

TO: DISTRICT CONSTRUCTION ENGINEERS
DISTRICT DESIGN ENGINEERS
DISTRICT STRUCTURES ENGINEERS
DISTRICT MAINTENANCE ENGINEERS
PROJECT MANAGEMENT

FROM: Greg Xanders, State Construction Engineer
Billy Hattaway, State Roadway Design Engineer

COPIES: Freddie Simmons, Bill Albaugh, Sharon Holmes, Ed Rice, Jack Brown, William Nickas, John Chiarelli, Brian Stock

SUBJECT: JJ HOOKS CONNECTED TEMPORARY CONCRETE BARRIER WALL

The JJ Hooks connected temporary concrete barrier wall system is a proprietary system developed by EASI-SET Industries. Barrier units produced by EASI-SET Industries licensees can be used on all State of Florida highway projects in lieu of the standard temporary concrete barrier wall units of Roadway and Traffic Design Standards, Index No. 415. The JJ Hooks barrier wall system shall be installed and maintained in conformance with Index No. 415, the plans and direction of the Engineer.

The JJ Hooks connected units can not be intermixed in a continuous run of barrier wall with standard pin and loop connected units or other wall units with connections dissimilar to the JJ Hooks connection.

There shall be no special pay compensation for the use of JJ Hooks connected barrier wall; payment for JJ Hooks connected temporary concrete barrier wall shall be made under the contract unit price (bid price) for Barrier Wall (Temporary)(Concrete) LF:M1.

If you have any questions, please contact John Grant at 414-4334.
