SUBJECT: APPROVAL OF NEW SECTION 347

As of January 1, 2006 a new Section 347 **Portland Cement Concrete Class I (Non- Structural)** has been approved by FHWA for use on FDOT projects. Existing contracts can replace Section 347 with the new specification using a no cost change order. The new specification provides the contractor with additional options to make effective use of available materials when placing Class I non-structural concrete.

If you have further questions, please feel free to contact Mike Bergin at 352-955-6666 or (sc 625-6666).
