MATERIALS BULLETIN NO. 03-13

DCE MEMORANDUM NO. 04-13

(FHWA Approved: 3/6/2013)

TO: **DISTRICT MATERIALS AND RESEARCH ENGINEERS
DISTRICT CONSTRUCTION ENGINEERS**

FROM: Timothy Ruelke P.E., Director, Office of Materials
David A. Sadler, P.E., Director, Office of Construction

COPIES: Paul Vinik, Mike Bergin, Tom Byron, Bob Burluson, Chad Thompson, Caitlin Alcorn,
Rafiq Darji, Rudy Powell

SUBJECT: **SEPARATION TECHNOLOGIES – JACKSONVILLE, FLY ASH (FA17)**

In order to prevent concrete placement delays due to the shortage of Class F fly ash from Separation Technologies- Jacksonville, concrete producers may request the Department implement a modified mix design approval process. This memorandum will allow placement of concrete prior to receiving formal Department mix design approval, and is only applicable for replacing Separation Technologies- Jacksonville Class F fly ash incorporated in currently approved concrete mix designs. The Contractor/Producer assumes all risks involved for ensuring that plastic and hardened properties are in compliance with the specifications at the time of placement.

If the modified mix approval process is used, the following requirements must be met:

1. District Materials Office personnel will ensure the replacement mix contains the same component materials and quantities as the replaced mix and only fly ash substitution is permitted. The new mix must meet the same requirements as the old mix, including yield, plastic and hardened properties. Adjustments to weights according to specific gravity of replacement fly ash chosen will be permitted as long as the replacement mix equals the original mix regarding application and environmental conditions. All materials must be from an approved source.
2. District Materials Office personnel will submit the replacement mix design to the State Materials Office similar to the material substitution procedure found in MM 9.2.6.8.
3. The State Materials Office will assign a new temporary design mix number with the old design mix number referenced in the mix design comments.
4. At the first job-site placement of the new mix, for first project, the Concrete Producer's ACI certified technician or the Contractor's QC certified CTQP inspector will cast a minimum of SIX 4x8 cylinders to be tested by the Concrete Producer's or the Contractor's CTQP qualified lab. THREE will be tested for 7-day results, and THREE will be tested for 28-

day results. If the producer elects to verify his strength earlier than 28 days, then additional cylinder sets of THREE may be fabricated at their discretion.

5. District Materials Office personnel will submit the Producer's 7 and 28-day test results to the State Materials Office. Whenever overdesign strength is reached, the new design mix will be fully approved as a new mix for FDOT use. **Acceptance cylinders shall not to be used for design mix approval.**

This memorandum does not waive any specification requirements but simply allows an expedient means to approve mix designs. It is in effect until April 15, 2013. After that date the normal mix design approval process will be in effect. It serves as a blanket approval to process this change as a no cost specification revision and shall be attached to the work order or supplemental agreement required for its processing.

Should you have any questions please contact Toby Dillow, State Materials Office at 352-955-6681 or Mike Bergin, State Materials Office 352-955-6666.

MEMORANDUM

**TO: Rudy Powell, State Construction Engineer
Doug Martin, Construction Systems Engineer**

FROM: David A. Sadler, Director, Office of Construction

COPIES: Heather Hicks, Administrative Assistant

SUBJECT: DELEGATION OF SIGNATURE AUTHORITY

This is to delegate signature authority for documents (excluding personnel actions) to you for when I am out of the office or on travel status from this date through July 31, 2013.

Ms. Hicks is also delegated authority for administrative type actions.

Please insure that my office receives a copy of all correspondence signed by you for these dates.
