SUBJECT: WORK ZONE SIGN SUPPORTS EXCEPTION

Design Standards, Index 600, General Notes for Work Zone Sign Supports requires all work zone sign supports to be crashworthy and to be included on the Approved Product List. The Design Standards will be revised in the future to allow an exception for signs located behind barrier or out of the clear zone, and the following General Note will be added:

Signs shielded by a barrier or located outside of the clear zone do not require a crashworthy support and are not required to be listed on the APL.

For contractors requesting this modification on projects, this memorandum serves as a blanket approval to process a \$0.00 contract change and should be attached to the Work Order or Supplemental Agreement. This memorandum will expire July 1, 2015.
