LTL-X RETROREFLECTOMETER

Training Video

The beginning of this video short describes the equipment from the manufacturer's standpoint.

It explains features and care of the equipment.

However, it contains pertinent information, definition of retroreflectivity, and why it is important in pavement markings.

The Training Development Team hopes you will find this information useful in your roadway activities.

DISCLAIMER

This video is not an endorsement of any product.

This video is for informational purposes only

The following tutorial is for inspectors, maintenance and other roadway personnel who need to assure reflectivity compliance with the MUTCD and FDOT requirements.
