

PrC Tips & Resources

CO System Section

Introduction

Our Primary goal is to improve the availability of construction project data, ensure the timely delivery and retrieval of information from multiple applications without compromising quality.

PrC Information

The Department migrated from SiteManager to AASHTOWare Project Construction (PrC) in September 2022.

For more information or assistance with Construction PrC, please contact: [Lynnette Bonin](mailto:Lynnette.Bonin@fdot.com) (850) 414-4251.

Update to Issues

- Citrix will remain unavailable for authentication.
- CIM continues to display incorrect data.
- AD Hoc reports may or may not reflect accurate data.
- Designer Interface is now available to Design Consultants.
- CPPR is still unavailable in CIM.

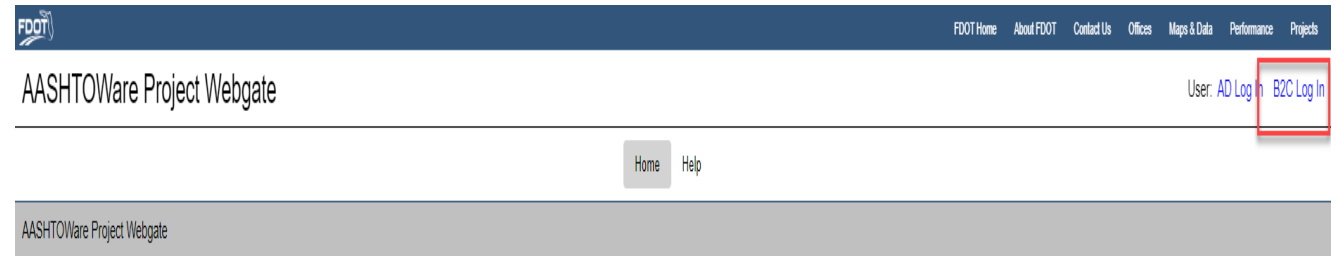

Access

Access is a known issue. Due to recent security breaches, changes are coming to our security model. We will no longer be using Citrix to authenticate into the system. If users are unable to connect send an email to FDOT Service Desk fdot.servicedesk@dot.state.fl.us

Design Consultants can access Design Interface by logging into the B2C Log In on the Webgate log in page.

Construction Information

Partial Payments Agency View

Existing partial payment pay items that have had payments made against them in PTS cannot be paid with the partial pay agency view. They will have to be manually calculated. Pay items that are eligible for partial pay that have not been paid on can have partial pay agency view applied. New contracts with partial payment eligible pay items can use the partial pay agency views on all eligible pay items. The District Office Admin will need to apply the partial pay agency view.

Construction Information

CPPR Update

The Department's policy for CPPR is to input data into CIM which "writes back" to PrC. Due to the ongoing issues with CIM, projects that require closeout can utilize the Contract's Past Performance Report form and input the CPPR grade in CIM once the issue has been resolved. The form can be found at

<https://www.fdot.gov/construction/forms>

<input type="text"/> (Proj. Administrator/Firm or Residency)	<input type="text"/> (Date Final Accepted)

Construction Information

Capturing Time on Diaries/DWRs

To capture time on a diary/dwr, a 0 or 1 must be entered in the 'current time charge' field to designate time as no-charge or charged time. If the field is left blank, the system recognizes this as a null value thus treating it as non-chargeable time. There is no way to correct this once it has been saved.

Construction Information

APL – Where to input information

[Materials Acceptance and Certification Development \(fdot.gov\)](https://www.fdot.gov/materials-acceptance-and-certification-development)

APL data is no longer stored in PTS. It will be input into the MAC system. Updates can be found at the website noted above. This applies to all contracts.

Topics of Interest

We have scheduled a tips session monthly through May 2023. We would like your input on what topics are relevant to you. Users should receive a survey for topics of interest, or you can send an email to CO-SCO-SystemSection@dot.state.fl.us.

Summary

- Other common themes from questions today will be addressed and posted on our PrC page with the recording from today
- Reoccurring Tips and Tricks on first Thursday of each month
