

## CHAPTER 14

# REQUESTING SPECIAL SCHEDULING OF MAINFRAME COMPUTER RESOURCES

### PURPOSE:

To establish the process required for requesting priority on computer jobs or special scheduling of mainframe computer resources outside normal service periods.

### AUTHORITY:

Sections 20.23(4)(a) and 334.048(3), Florida Statutes (F.S.)

### SCOPE:

This procedure applies to all personnel authorized to request special scheduling of the mainframe computer resources.

### GENERAL BACKGROUND:

~~The Business Systems Support Office (BSSO) and the Technology Services and Support Office (TSSO),~~ The Office of Information Technology's (OIT) Application Services and District IT Services, provide standard mainframe computer system services to employees and other parties involved with the work of the Department.

These services include on-line transaction and batch processing for computer application systems through the Customer Information Control System (CICS), the Time Sharing Options (TSO) environment, and connections from various distributed mechanisms.

These services are available on regular scheduled hours of availability. Occasionally, business needs are such that these services need to be available outside these normal scheduled time frames. In addition, the demand for critical business processes is sometime such that certain computer jobs need to have a higher priority in order to expedite turnaround to accommodate critical needs.

This procedure addresses the process to request special mainframe resource availability and computer job priority.

## 14.1 SCHEDULING MAINFRAME RESOURCES BEYOND REGULARLY SCHEDULED HOURS

**14.1.1** Requests for special scheduling of mainframe resources beyond the regularly scheduled hours must be sent by e-mail to BSSO's Application Service's DBA Tech group (using the CO-DBAT Outlook distribution list or CO-DBAT@dot.state.fl.us). The request should be made at least 24 hours in advance of when the variation is needed but critical business situations will be taken into consideration for exceptions.

**14.1.2** Central office users must submit their requests through their Office Manager. District users must submit their requests through their Technology Services and Support Manager.

## 14.2 REQUESTING PRIORITY ON COMPUTER JOBS

**14.2.1** Requests for increasing the priority of mainframe jobs must be sent by e-mail to BSSO's Application Services' DBA Tech group (using the CO-DBAT Outlook distribution list or CO-DBAT@dot.state.fl.us). This request must include the specific details of the job, approximate execution time of the job, and the business justification for higher priority.

**14.2.2** BSSO Application Services is responsible for making a determination of the impact of the request on other computer system resources and documenting in e-mail any conflicts (see **Section 14.4**).

**14.2.3** Priority processing should only be requested for jobs that are absolutely needed to meet special schedules or for critical business situations.

## 14.3 NOTIFICATION OF RESCHEDULED COMPUTER AVAILABILITY

Changes to normal system availability will be posted as system broadcast messages under TSO, Supersession and the Web servers as practical. These messages appear when users "log on", will be posted to provide optimal warning and will remain until the schedule reverts back to normal. The BSSO Application Services Manager is responsible for ensuring the issuance of the broadcast messages, and notifying the Chief Information Officer via e-mail of the change from the normal system availability, and later of the return to normal system availability.

## 14.4 SCHEDULING CONFLICTS

BSSO's Application Services' DBA Tech group is responsible for ensuring any conflicts

with the scheduling of priority jobs or special system availability is resolved by the appropriate supervisory or management personnel in both the user office and the Office of Information ~~Systems~~Technology. Should the proper coordination ever fail to reach an acceptable solution, this group will coordinate with the ~~BSSO~~Application Services Manager to notify the Chief Information Officer and the manager of the requesting user office via e-mail of the situation.

**TRAINING:**

None required.

**FORMS:**

None required.
