ROADWAY DESIGN BULLETIN 15-07
TRAFFIC OPERATIONS BULLETIN 02-15
(FHWA Approved: April 13, 2015)

DATE: April 15, 2015

TO: District Directors of Transportation Operations, District Directors of Transportation Development, District Design Engineers, District Consultant Project Management Engineers, District Construction Engineers, District Maintenance Engineers, District Geotechnical Engineers, District Structures Design Engineers, District Roadway Design Engineers, District Traffic Operations Engineers, Program Management Engineers

FROM: Michael Shepard, P.E., State Roadway Design Engineer
       Mark Wilson, P.E., Director, Office of Traffic Engineering & Operations
       Marjorie Kirby, Manager, State Environmental Management Office

COPIES: Brian Blanchard, Tom Byron, David Sadler, Tim Lattner, Trey Tillander, Bruce Dana, John Krause, Robert Robertson, Bob Crim, Rudy Powell, Greg Schiess, Nicholas Finch (FHWA), Jeffrey Ger (FHWA), Chad Thompson (FHWA), Phillip Bello (FHWA)

SUBJECT: Evaluation of Intersections for Roundabouts

This bulletin introduces a new policy covering the evaluation of intersections for roundabouts as further supported by the new 2015 Florida Intersection Design Guide.

REQUIREMENTS

1. Delete PPM, Volume 1, Section 2.13.1 and replace it with the following:

   The National Cooperative Highway Research Program (NCHRP) Report 672, Roundabouts: An Informational Guide, is adopted by FDOT and establishes criteria and procedures for the operational and safety analysis of modern roundabouts in the United States. In addition, the Florida Intersection Design Guide contains Florida specific guidelines and requirements for evaluation and design of roundabouts in Florida.

www.dot.state.fl.us
A roundabout alternative must be evaluated on new construction and reconstruction projects. Evaluation is also required for all other types of projects that propose new signalization or require a change in an un-signalized intersection control. An evaluation is not required for minor operational improvements such as changes to signal phasing, or for signal replacement projects where the primary purpose is to upgrade deficient equipment and installations.

To construct a roundabout on the state highway system one of the following criteria must be met:

- MUTCD traffic signal warrants 1 or 2
- Documented high frequency of severe crashes
- Context Sensitive Solution for the implementation of Complete Streets on a low speed facility.

While roundabouts may provide a community enhancement, they are not be constructed on state roads solely for this purpose.

Use 20-year design traffic for roundabout evaluation and design. Roundabouts are not to be considered at locations where the design year total traffic volume entering the intersection exceeds 25,000 AADT for a single-lane roundabout, or 45,000 AADT for a two lane roundabout.

All roundabout designs must be approved by the State Roadway Design Engineer.

Modification for Non-Conventional Projects:

See the RFP for requirements.

2. Add the following to PPM, Volume 1, Section 25.4.17:

When there are proposed changes in intersection control a roundabout alternative must be considered. See Section 2.13.1 in Chapter 2 of this Volume for additional information.

3. The 2015 Florida Intersection Design Guide (FIDG) has been released and is available on the Roadway Design Internet site. Detailed information on the Roundabout Evaluation Process is included in Chapter 7 of the current FIDG.

COMMENTARY

Current PPM language requires roundabouts to be evaluated on new construction, reconstruction, and safety improvement projects, as well as any time there are proposed changes in intersection control that will be more restrictive than the existing condition. This bulletin, along with the 2015
Florida Intersection Design Guide, establishes a process to be followed to satisfy the roundabout evaluation requirement.

BACKGROUND

Prior to this bulletin, there was no guidance available to define what constitutes a formal roundabout evaluation. The roundabout evaluation process presented in this bulletin is being implemented to eliminate confusion and promote consistency across all Districts in the consideration and evaluation of roundabouts.

IMPLEMENTATION

The requirements of this bulletin are effective immediately. These requirements may be waived for projects currently in the design phase and implementation will adversely impact the project’s schedule.

CONTACT(s) The following FDOT staff served on the Roundabout Task Team:

Angela L. Wilhelm, P.E.  
State Traffic Studies Engineer  
Traffic Engineering and Operations Office  
605 Suwannee Street, MS 36  
Tallahassee, FL 32399  
Phone: (850) 410-5417  
Angela.Wilhelm@dot.state.fl.us

Joseph B. Santos, P.E.  
State Safety Engineer  
State Safety Office  
605 Suwannee Street, MS 53  
Tallahassee, Florida 32399-0450  
Phone (850) 414.4097  
Joseph.Santos@dot.state.fl.us

David Amato, PE  
Roadway Design Engineer  
State Roadway Design Office  
605 Suwannee Street, MS 33  
Tallahassee, FL 32399-0450  
Phone (850) 414-4792  
david.amato@dot.state.fl.us

Catherine Bradley, P.E.  
State Project Development Engineer  
State Environmental Management Office  
605 Suwannee Street, MS 42  
Tallahassee, Fl. 32399-0450
