**CORROSION RESISTANT GRAVITY WALL NOTES**

1. C-I-P Gravity Walls constructed as extensions of reinforced concrete retaining walls, except walls of proprietary designs, shall have the same face texture and finish as the reinforced concrete retaining wall.

2. Concrete for Gravity Wall shall be Class KS per Section 347. Concrete for Scheme 3 Junction Slab and Traffic Railing shall be Class II per Section 346, unless otherwise specified in the plans.

3. Reinforcing bars shall meet the requirements of Specification Section 932 for GFRP.

4. When required, for adjacent guardrail, see Index 870 or 880 as appropriate. For adjacent Type B fence see Index 802.

5. Joint seal to be two layers of 30# smooth roofing paper or Type D-5 geotextile fabric in accordance with Specification Section 965. Mop all contact surfaces of concrete and roofing paper or geotextile fabric with cut-back asphalt. Stop roofing paper or geotextile fabric 6" below top of wall.

6. Provide a continuous 1" clean gravel or crushed rock drain for wall heights 3 ft. and higher. Hrap drainage layer as shown, with Type D-5 geotextile fabric in accordance with Specification Section 965. Provide 8" x 8" galvanized mesh with 1/2" openings, at the inside end of the PVC Drain Pipe. Provide 2" PVC Drain Pipe (Sch. 40) at 10 ft. max. spacing (when Drainage Layer is required). Locate outermost edge of Drain Pipe a minimum of 2'-0" from wall joints.

7. Cost of reinforcing, face texture, finish, joint seal, drain pipes, drainage layer, galvanized mesh and geotextile fabric to be included in the Contract Unit Price for Concrete Class NS, Gravity Wall. Cost of concrete for Junction Slab in Scheme 3, to be included in Contract Unit Price for Concrete Traffic Railing Barrier with Junction Slab. Adjacent railings or fences to be paid for separately.
