**General Notes:***

1. This inlet is to be used only in traffic separation Type 8 and 9 or in separation constructed with Curb, Type 1, 2, 3, 4, 5, or 6 or in a separation constructed with Curb, Type 1, 2, 3, 4, 5, or 6, as applicable. It is subject to the provisions of American Society of Civil Engineers, Standard AASHTO, for sidewalks.

2. Reinforcing #8 bars of #2 are to be used unless otherwise noted. For larger bars, 3/4 in. diameter or larger, Code Section No. 269 should be used.

3. Recommended maximum pipe sizes are 24 in. inlet and 30 in. outlet. For larger pipes, those with A.R. better than No. 30, are recommended.

4. For installation details see Index No. 84.

5. Inlet to be paid for under the contract unit price for inlets (Curb 1 Type 5 & 6, each).
