NOTES FOR CONCRETE SIDEWALK ON CURBED ROADWAYS

1. Sidewalks shall be constructed in accordance with Section 522 of the FDOT Standard Specifications. Public sidewalks shall be a minimum of 48 inches wide and shall be constructed in accordance with Index No. 304. Detectable warnings are not required where sidewalks intersect urban traveled turnouts.

2. Bond breaker material can be any impermeable coated or sheet membrane or preformed material having a thickness of not less than 6 mils nor more than 15 mils.

3. For turnouts see Index No. 515.

4. Construct sidewalks with 1" thick Edge Beam through the limits of any surface mounted Pedestrian/Bicycle Picket Railing or Pipe Guardrail shown in the plans.

5. Sidewalk shall be paid for under the contract unit price for Sidewalk Concrete (____ Thick), S.Y.
NOTES FOR CONCRETE SIDEWALKS ON UNCURBED ROADWAYS

1. Sidewalks shall be constructed in accordance with Section 522 of the FDOT Standard Specifications.

2. Provide detectable warnings that extend the full width of the sidewalk and 24" deep from the edge of pavement where sidewalks abut the following vehicular ways:
   - Side roads and streets
   - Driveways with signalized entrances
   - Driveways with entrance volumes greater than 600 vpd
   - Driveways with entrance speeds of 25 mph or greater
   - Right-in/right-out composite driveways

   Detectable warning surfaces shall conform to the requirements described in the General Notes of Index 304. To the extent practical, the rows of truncated domes in a detectable warning surface should be aligned to be perpendicular or radial to the street, roadway, or driveway, as applicable.

   For sidewalks continuous through driveways, detectable warning surfaces are not required.

3. For turnouts see Index No. 515.

4. Construct sidewalks with 1" thick edge beam through the limits of any surface mounted Pedestrian/Bicycle Picket Railing or Pipe Guardian shown in the plans. See Sheet 1 for details.

5. Sidewalk shall be paid for under the contract unit price for Sidewalk Concrete (--- Thick), S.Y.

CONCRETE SIDEWALK FOR UNCURBED ROADWAYS

---

[Diagram of longitudinal sections and joints, including:]

- **Flexible Joint:**
  - 30" Max.
  - E Joint(s) Required When Length Exceeds 30"

- **Rigid Joint:**
  - 120" Max.
  - 30" Max.

---

**OPEN JOINTS**

**SIDEWALK JOINTS**

**JOINT LEGEND**

- A = 1/8" Expansion Joints (Preformed Joint Filler)
- B = 1/2" Dummy Joints, Tool Set
- C = 1/8" Formed Open Joints
- D = 1/4" Saw Cut Joints, 1/8" Deep (24 Hour) Max. 5 Centers
- E = 1/2" Saw Cut Joints, 1/8" Deep (12 Hour) Max. 30 Centers
- F = 1/2" Expansion Joint When Run Of Sidewalk Exceeds 120'

Intermediate locations when called for in the plans or at locations as directed by the Engineer.
