EDC INSTRUMENTATION FOR
SQUARE PRESTRESSED CONCRETE PILES

NOTE:
Provide EDC Instrumentation in square prestressed concrete piles (18" and larger) in accordance with Specification Section 455 for abridge foundations.

Provide one (1) \( \frac{1}{4}" \) vent hole near top of pile on two (2) opposite faces of pile.

Antenna (centered over Top Gauge)

Head of Pile

Dataport Interface Cable (to radio module assembly)

Bottom surfaces of enclosure to be epoxy coated just prior to concrete casting per manufacturer's installation procedures.

Provide one (1) \( \frac{1}{4}" \) vent hole near top of pile on two (2) opposite faces of pile.
