### Curb and Gutter

**Type A**
- See diagram right.
- For details depicting usage adjacent to flexible pavement, see Sheet 2.
- Use adjacent to concrete or flexible pavement.
- Requires between curbs and concrete pavement only, see Sheet 2.

**Type B**
- See diagram right.
- Use adjacent to concrete or flexible pavement.
- Requires between curbs and concrete pavement only, see Sheet 2.

**Type C**
- See diagram right.
- Use adjacent to concrete or flexible pavement.
- Requires between curbs and concrete pavement only, see Sheet 2.

**Type D**
- See diagram right.
- Use adjacent to concrete or flexible pavement.
- Requires between curbs and concrete pavement only, see Sheet 2.

**Type E**
- See diagram right.
- Use adjacent to concrete or flexible pavement.
- Requires between curbs and concrete pavement only, see Sheet 2.

**Type F**
- See diagram right.
- Use adjacent to concrete or flexible pavement.
- Requires between curbs and concrete pavement only, see Sheet 2.

**Type RA**
- Use adjacent to concrete or flexible pavement.
- Requires between curbs and concrete pavement only, see Sheet 2.

### Curb and Gutter

**Future Curb And Gutter Construction**
- See diagram right.

**Section AA**
- See diagram right.

**Section BB**
- See diagram right.

**Section CC**
- See diagram right.

**Valley Gutter**
- See diagram right.

*When used on high side of roadways, the cross slope of the gutter shall match the cross slope of the adjacent pavement. The thickness of the lip shall be 6", unless otherwise shown on plans.*

*Rotate entire section so that gutter cross slope matches slope of adjacent circulating roadway pavement.*

*For use adjacent to concrete or flexible pavement. For details depicting usage adjacent to flexible pavement, see Sheet 2. Expansion joint, preformed joint filler and joint seal are required between curb & gutter and concrete pavement only, see Sheet 2.*

**CONCRETE CURB**

**CONCRETE CURB AND GUTTER**
CURB AND GUTTER ENDINGS

CURB AND GUTTER TYPES E & F

CURB AND GUTTER TYPES A & B

CONTRACTION JOINT IN CURB AND GUTTER

CONTRACTION JOINT IN CURB

EXPANSION JOINT BETWEEN GUTTER AND CONCRETE PAVEMENT

GENERAL NOTES

1. For curb, gutter, and curb & gutter provide W - W contraction joints at 10' centers (max.). Contraction joints adjacent to concrete pavement on tangents and flat curves are to match the pavement joints, with intermediate joints not to exceed 10' centers. Curb, gutter, and curb & gutter expansion joints shall be located in accordance with Section 520 of the Standard Specifications.

2. Ends of Curbs Types B and D shall transition from full to zero heights in 3'.
