GENERAL NOTES

1. TWO-WAY TRAFFIC signs shall be repeated every ½ mile in each direction, throughout the tangent distance (T).

2. \( L = \frac{W}{S} \) for speeds \( \leq 45 \) mph
   \[ \frac{W}{40} \] for speeds \( > 40 \) mph

   Where:
   \( W \) = Width of lateral transition in feet.
   \( S \) = Posted speed limit (mph).

3. Where the tangent distance (T) exceeds 250', spacing between Type I or II barricades or vertical panels or drums may be increased to 100' within the limits of the tangent, or post mounted delineators at 50' centers may be substituted for barricades, vertical panels or drums.

4. All existing pavement markings within the realignment which conflict with the revised traffic pattern are to be removed and removable pavement markings used for making new edge lines.

5. When side roads, cross roads or interchanges intersects the highway within the TTC zone, additional TTC devices shall be placed in accordance with other applicable TTC indexes.

6. For general TTC requirements and additional information, refer to Index No. 600.
