RAISED RUMBLE STRIPS AT INTERSECTIONS

** Note:** Rumble strips may be required for one or more legs of the intersection (one leg shown for spacing information). Rumble strips shall be constructed only on the legs identified in the plans.

**Caution:**

- For roadways without paved shoulders, c = 1.5'
- For roadways with paved shoulders, c = 0'

**PLAN**

- 400' Alert/Reaction Zone
- Braking Zone

**THERMOPLASTIC SET**

- Thermoplastic Rumble Strip (Typical)
- Use multiple applications to achieve desired depth thickness

**Note:** Intersection thermoplastic rumble strip sets shall be white.

**SECTION AA FOR THERMOPLASTIC AND ASPHALT RUMBLE STRIP SETS**

**ASPHALT SET**

- Asphalt Rumble Strip (Typical)

**NOTE:**

- Raised rumble strips are to be constructed in accordance with Section 546 of the Specifications.

**INSET A**

- Rumble Strip Set
- Edge of Traveled Way
- C = 0' for roadways with paved shoulders
- C = 1.5' for roadways without paved shoulders
