Chapter 2

Sequence of Plans Preparation

2.1 General

The set of plans depicting in detail all the desired construction work is known as the "Contract Plans Set". This set consists of all sheets pertaining to roadway design (Roadway Plans), and those of the other component plans. The other component plans are comprised of:

1. Signing and Pavement Marking Plans
2. Signalization Plans
3. Intelligent Transportation Systems (ITS) Plans
4. Lighting Plans
5. Landscape Plans
6. Architectural Plans
7. Structures Plans
8. Toll Facility Plans

Do not use components other than those listed above.

Modification for Non-Conventional Projects:

Delete the last sentence of the above paragraph and see RFP for requirements.

Utility Work by Highway Contractor Agreement Plans have a separate Financial Project ID and are typically treated as a strung project. When utility work is minimal, the District may decide to include these plans as a component set to the lead plans set.

The contract plans set should be prepared systematically, undergoing phases of review and revision to ensure technically correct and clear plans.
If the plans are structures plans and there is no work on the approach roadway, the structures plans become the lead project. Any other sheets incidental to the project typically found within the roadway plans or other component plans (i.e., traffic control plans, signing and marking, etc.), may be included in the structures plans and numbered consecutively in accordance with the *Structures Manual, Volume 2 – Structures Detailing Manual*.

Prepare Toll Facility Plans in accordance with the Florida’s Turnpike Enterprise current *General Tolling Requirements (GTR)*. The GTR and Addendum(s) to the GTR can be downloaded from the following link:

[http://www.floridasturnpike.com/design/gtr.html](http://www.floridasturnpike.com/design/gtr.html)

### 2.2 Data Collection and Presentation

#### 2.2.1 Type of Project

The type and amount of data required for each project depends on the project. For new construction and reconstruction projects which have had a Project Development and Environment (PD&E) phase the data to be used for plans preparation could include the following:

1. Preliminary Engineering Report
2. Project Scope
3. Project schedule
4. Field survey and/or CADD files (including existing features such as topography, ground elevations, drainage structures, and right of way)
5. R/W requirements
6. Soils information
7. Commitments for environmental permits or mitigation
8. Typical Section Package
9. Traffic Data
10. Pedestrian and bicycle considerations
11. Structural design requirements
12. Commitments to local government(s)
For projects without the PD&E phase, such as RRR or Safety projects, some of the items listed will not be available. Begin all projects with a record search of available data and a field review by the Engineer of Record to determine additional data requirements such as supplemental survey needs, traffic data, utility information, etc.

**Modification for Non-Conventional Projects:**

See RFP for available data.

Additional information can be found in *Chapters 13-16 of Volume 1*. These chapters contain a comprehensive discussion of the critical issues and major activities for the design process, from initial to final engineering.

### 2.2.2 Presentation of Existing Data

CADD files generated from the field survey will contain existing topography and other characteristics of the project site. These also include the existing utilities and drainage structures within the limits of the project.

Show data pertaining to topography, horizontal location of existing utilities and drainage structures on the plan portion of the appropriate sheets (whether they are plan view only, or plan-profile).

### 2.2.3 Proposed Typical Section

Typical sections show the cross sectional design elements of a roadway. In addition to the Typical Section Sheet, certain elements of the typical section are shown on various other plan sheets, such as the Plan-Profile Sheets and Cross Sections. The various chapters for individual plan sheets address the specific requirements for displaying data (including typical section elements) on those sheets. Specific requirements for typical section sheets are presented in *Chapter 6* of this Volume.

### 2.2.4 Geometrics

The Engineer of Record (EOR) sets the horizontal and vertical geometrics for a project and develops or supervises development of the CADD files used in the production of various plans sheets.
Horizontal geometrics include the baseline survey/centerline construction with bearings, curve data, angles or bearings at street intersections, pavement widths, taper lengths, left turn lanes, and other geometric elements. These elements are plotted on the plan portion of the plan-profile sheets, as well as other appropriate plan sheets.

Vertical geometrics show the vertical curves and grades of the roadway along the profile grade line. On municipal projects back-of-sidewalk profiles are developed to provide a vertical alignment which addresses drainage requirements and harmonizes connections to adjacent properties. The back-of-sidewalk profiles may be included in the roadway plans as directed by the district.

On all projects which include the development of a vertical alignment, the existing ground line along the baseline of survey and the proposed profile grade line must be plotted on the profile portion of appropriate sheets in the roadway or structures plans.

2.2.5 Cross Sections

Information required for plotting existing cross sections is obtained from survey data and CADD files. These data, along with existing utilities and proposed templates, are shown on the cross sections. Refer to Chapter 18 of this volume for additional information.

2.3 Phase Submittals

<table>
<thead>
<tr>
<th>Modification for Non-Conventional Projects:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete PPM 2.3 and follow PPM 2.4.</td>
</tr>
</tbody>
</table>

2.3.1 General

Requirements relating to the design process for various submittals are given in Chapter 16, Volume 1 of this manual. Refer to that chapter for additional guidance in preparing submittals for review by the Department.

For bridge submittal requirements see Chapter 26, Volume 1.
2.3.2 Phases

The remainder of this section outlines, in detail, the sequence for contract plans preparation and assembly, as well as the information required to be presented on the various plan sheets which are included in design phase submittals.

As stated in Section 16.4 of Volume 1: "The number of submittals and phase reviews is determined on a project-by-project basis and defined in the scope. Submittals allow functional areas to review the development of the project as contained in the scope."

Standard submittal phases are as follows:

<table>
<thead>
<tr>
<th>SUBMITTAL PHASES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Phase I</td>
</tr>
<tr>
<td>Phase II</td>
</tr>
<tr>
<td>Phase III</td>
</tr>
<tr>
<td>Phase IV</td>
</tr>
</tbody>
</table>

Minor projects should typically have two phase reviews, which will be defined in the Scope of Services.

Figure 2.1 summarizes the plans sheet status for each submittal. No phase is complete until all review comments have been resolved and documented.

The technical accuracy required for the design is the responsibility of the Engineer of Record. Prior to submitting the plans for a formal FDOT Phase review, the design organization (in-house or consultant) must conduct an internal Quality Control (Q/C) review to ensure technically correct and complete plans. Revisions or corrections noted during the Q/C review must be incorporated into the plans before submittal for the formal Phase review.

When deemed necessary by the Engineer of Record, or as requested by the district, phase submittals may include an additional plan sheet titled "Notes for Reviewers." This sheet is placed as the second sheet in the submittal package. It contains information pertinent to design criteria and special project requirements, as well as other details or notes which call the reviewer's attention to issues and features unique to the project design. The sheet is to be used only in the review process and is not included in the final plans.

Status Key:
   P - Preliminary
   C - Complete but subject to change
   F - Final

* Projects which have a structures plans component are required to submit the latest set of structures plans with the Phase II roadway submittal.
2.3.2.1 Requirements for Phase I Submittal

Unless otherwise directed by the Department, the following elements are required for a Phase I set of plans.

**KEY SHEET**
- Location Map w/ location of project on map
- All applicable Financial Project ID's (Federal Funds) notation, if applicable
- Exceptions & Equations
- County Name
- State Road Number
- Length of project box
- North arrow and scale
- Approval signature lines
- Railroad crossing (if applicable)
- Revision box
- Governing Standards & Specifications dates
- Project Manager's Name
- Begin & end project station and begin mile post
- Begin & end bridge stations
- Consultant's name, address, contract number, Certificate of Authorization number and vendor number (if applicable)

**DRAINAGE MAP - PROFILE VIEW**
- Preliminary profile grade & existing ground line
- Horizontal & vertical scale
- Begin & end stations of project, bridges, bridge culverts & exceptions
- Equations

**INTERCHANGE DRAINAGE MAP**
- North arrow and scale
- Stationing along baselines
- Ramp baselines with nomenclature
- Begin and end bridge stationing
- Preliminary interchange configuration
- R/W lines
- Preliminary interchange drainage with drainage areas and flow direction arrows

**TYPICAL SECTIONS**
- Mainline and crossroad typicals
- R/W lines
- Special details (bifurcated sections, high fills, etc.)
- Traffic data

**PROJECT LAYOUT**
- Plan-profile sheet sequence (mainline and crossroads)

**PROJECT CONTROL**
- Benchmarks
- Reference points
- Control points
**PLAN AND PROFILE - PLAN VIEW**
- North arrow and scale
- Baseline of survey, equations
- Curve data (including superelevation)
- Existing topography including utilities
- Preliminary horizontal geometrics/dimensions
- Existing & proposed R/W lines (if available)
- Centerline of construction (if different from the baseline of survey)
- Begin and end stations for the project, bridges, bridge culverts and exceptions
- Reference points (if project layout sheet not included in plans set)

**PLAN AND PROFILE - PROFILE VIEW**
- Scale
- Appropriate existing utilities
- Bench mark information
- Preliminary profile grade line
- Equations
- Existing ground line with elevations at each end of sheet
- Begin and End Stations for the Project, bridges, bridge culverts and exceptions.

**SPECIAL PROFILE**
- Scale
- Ramp profile worksheet including nose sections
- Existing ground line of intersections
- Preliminary grade line of intersections
- Preliminary curb return profiles, if applicable

**BACK-OF-SIDEWALK PROFILE (Worksheet)**
- Scale
- Begin and end project stations
- Begin and end sidewalk stations
- Cross-street locations and elevations
- Drainage flow direction arrows
- Mainline equations
- Existing driveway locations and details
- Superelevation details
- Back-of-sidewalk profile grades and vertical curve information
- Building floor elevations with offset distance left and right

**BACK-OF-SIDEWALK PROFILE (Worksheet) (con't)**
- Gradeline notation: Specifically the numeric difference relative to roadway profile gradeline

**INTERCHANGE DETAIL**
- North arrow and scale
- Schematic of traffic flow and volumes
- Proposed bridge limits
- R/W lines
- Preliminary configuration and geometrics
- Quadrant Identification
- Ramp Labels

**INTERSECTION LAYOUT**
- North arrow and scale
- Existing topography (if applicable)
- Proposed R/W limits
- Length of turn lanes
- Taper lengths
- Existing Utilities
- Geometric dimensions (radii, offsets, widths)

**CROSS SECTIONS**
- Scale
- Existing ground line
- Existing survey baseline elevations
- Station numbers
- Baseline of survey labeled
- Existing utilities
- Proposed template with profile grade elevations along mainline and cross-streets as necessary

**TEMPORARY TRAFFIC CONTROL PLANS**
- Project specific
- Other worksheets as necessary to convey concept and scope.

**LANDSCAPE PLANS**
- Conceptual landscape plan

*May require accompanying cross section pattern sheet*
2.3.2.2 Requirements for Phase II Submittal

Unless otherwise directed by the Department, the following elements are required for a Phase II set of plans.

**KEY SHEET**
- Index of sheets
- Contract plans and component plans list

**SIGNATURE SHEET**
(Signature Sheet is not part of the Classical Electronic Delivery)
- Sections for each Professional of Record
- Index of sheets for each Professional of Record
- Image of the seal(s)
- Appearance of the Digital Signature only to be applied in Phase IV
  (Note: Digital Signatures are not to be applied in this Phase)

**SUMMARY OF PAY ITEMS**
- Item numbers with descriptions

**DRAINAGE MAP - PLAN VIEW**
- Proposed structures with structure numbers
- Proposed storm drain pipes
- Flow arrows along proposed ditches
- Retention/Detention ponds, pond number and area size
- Cross drains with pipe sizes and structure numbers
- Bridges/bridge culverts with begin and end stations
- Flood data (if applicable)

**DRAINAGE MAP - PROFILE VIEW**
- Ditch gradients including DPIs
- Final roadway profile grade line
- Mainline storm drain pipes
- Mainline flow line elevations
- Mainline structures with structure numbers and pipes
- Bridge, Bridge Culvert
- Cross drains with pipe sizes, structure numbers and flow line elevation

**OPTIONAL MATERIALS TABULATION**
- Material type
- Structure number station and description
- Durability, cover requirements
- Optional culvert material application
- Culvert service life estimator
- Design service life

**PROJECT LAYOUT**
- Complete

**PROJECT CONTROL**
- Complete

**PLAN AND PROFILE - PLAN VIEW**
- Curb return numbers, station ties and elevations
- Proposed drainage structures with structure no.
- Proposed R/W lines
- Existing utilities
- Proposed side drain pipe requirements (including size) for access and intersections
- Final geometrics and dimensions including radii, station pluses, offsets, widths, taper/transition lengths, curve data
- General notes (if project layout sheet not included)
- Flood data if not shown elsewhere
- Limits of wetlands

**PLAN AND PROFILE - PROFILE VIEW**
- Final profile grades and vertical curve data
- Mainline storm drain pipes
- Proposed special ditches
- Ditch gradients with DPI station and elevation
- Non-standard superelevation transition details
- High water elevations
- Existing utilities
- Mainline drainage structures with structure numbers
- Cross drains with structure number, size and flow line elevations
TRAFFIC MONITORING SITE
Project Specific

INTERCHANGE DRAINAGE MAP
Final geometrics including PC and PT
Proposed structures with structure numbers
Proposed storm drain pipes
Special ditches with DPI and elevation

TYPICAL SECTIONS
Pavement Design

SPECIAL PROFILE
Final intersection profile grades
Final curb return profiles (if applicable)
Superelevation diagrams as required
Final ramp profile grades including nose sections
Preliminary access and frontage road profiles
(may contain one or more types of special profiles.)

BACK-OF-SIDEWALK PROFILE
Complete

INTERCHANGE LAYOUT
Curve data including superelevation and design speed
Coordinate data, stationing and ties
Access and/or frontage roads with dimensions and R/W
Fence location
Ramp identification

RAMP TERMINAL DETAILS
Preliminary geometrics
Radii, transition/taper lengths
Ramp identification

INTERSECTION LAYOUT
Limits of proposed construction along side roads
Applicable notes
Cross drains with structure numbers and pipe sizes
Storm drain pipes including sizes

INTERSECTION LAYOUT (con’t)
Final geometrics including dimensions, radii, offsets, station plus and taper/transition lengths

DRAINAGE STRUCTURES
Vertical and horizontal scale
Roadway template with profile grade elevation
Underground utilities
Special sections at conflict points
R/W lines (at critical locations)
Storm drain construction notes
Flow arrows
Applicable notes
Structure numbers and location station along right side of sheet
Drainage structures with numbers in numerical order, type, size, location and flowline elevations

OUTFALL / LATERAL DITCH
SYSTEM - PLAN VIEW
North arrow and scale
Roadway centerline
Existing and/or survey ditch centerline
Proposed ditch centerline with stationing
Begin and end ditch stations
Equations
Ditch centerline intersection stations
R/W lines
Bearings of ditch and mainline centerlines
Proposed storm drain pipes
Ditch PI stations with deflection angle left or right
Proposed drainage structures with structure numbers
Existing topography, drainage structures, utilities
Limits of wetlands
OUTFALL / LATERAL DITCH
SYSTEM - PROFILE VIEW
Bench mark information
Scale
Existing ground line
Proposed ditch profile with grades
Begin and end ditch stations
High water elevations
Proposed storm drain pipes with size
Existing Utilities
Overland flow or overtopping elevations
Proposed drainage structures with structure numbers
Typical section can be placed in either plan or profile

LATERAL DITCH CROSS SECTIONS
Horizontal and vertical scale
Existing ground line
Station numbers
Survey centerline and elevation
R/W
Begin and end ditch stations
Begin and end excavation stations
Earthwork quantities
Existing utilities
Total earthwork quantity in cubic yards (CY)
Proposed template with ditch bottom elevation

RETENTION/DETENTION POND DETAILS
North arrow and scale
Roadway centerline ties
Proposed pond centerline with stationing
Begin and end pond stations
Side slopes, dimensions, and elevations
R/W lines
Berm, fence and gate locations
Soil boring information
Proposed pond drainage structures with structure numbers
Existing topography, drainage structures, utilities
Pond sections (2 perpendicular to each other)
Pond Typical Section
Limits of wetlands

RETENTION/DETENTION POND CROSS SECTIONS
Horizontal and vertical scale
Existing ground line
Station numbers
Begin and end pond stationing
Pond centerline and elevations
R/W
Soil borings
Water table
Extent of unsuitable material
Earthwork quantities
Existing utilities
Proposed template with bottom elevation

CROSS SECTION PATTERN
North arrow and scale
Interchange layout
Access and frontage roads
Mainline and ramp stationing
Begin and end bridge stations
Cross section location lines
Ramp baselines with nomenclature and stationing

ROADWAY SOIL SURVEY
Soil data
Project specific

CROSS SECTIONS
R/W
Special ditch bottom elevations
Equivalent stations for ramps and mainline
Mainline equation stations
Soil borings
Water table
Extent of unsuitable material
Proposed template with profile grade elevation
Earthwork Columns
Begin and end stationing for project, construction and earthwork, bridge and bridge culvert
Existing utilities affected by the template and where unsuitable materials are present
STORMWATER POLLUTION PREVENTION PLANS (SWPPP)
Narrative Description (with supplemental topographic maps, when used)

TEMPORARY TRAFFIC CONTROL PLANS
Preliminary traffic control plan
Detour plan
Phasing plan
R/W - existing and additional if required
Existing Utilities

UTILITY ADJUSTMENTS
All existing utilities highlighted

SELECTIVE CLEARING AND GRUBBING
Limits of construction by station and type of selective clearing and grubbing

MITIGATION PLANS
Project Specific

MISCELLANEOUS STRUCTURES PLANS
Retaining walls (Cast in place, proprietary, temporary) if required

SIGNING AND PAVEMENT MARKING PLANS - PLAN SHEETS
North arrow and scale
Basic Roadway Geometrics
Begin/End Stations and Exceptions
Station equations
Conflicting utilities, lighting or drainage
Pavement markings
Sign locations
Applicable pay items

SIGNING AND PAVEMENT MARKING PLANS - SIGN DETAIL SHEETS
GUIDE SIGN WORK SHEETS
Project Specific

SIGNALIZATION PLANS - KEY SHEET
Financial Project ID
(Federal Funds) notation, if applicable
State Road Number
County Name
FDOT Project Manager's Name
Begin/end stations & exceptions
Station Equations (if location map is shown)
Engineer of Record
Consultants name & address, if applicable

SIGNALIZATION PLANS - TABULATION OF QUANTITIES
Project Specific

SIGNALIZATION PLANS - PLAN SHEET
North arrow and scale
Basic Roadway Geometrics
Begin/End Stations and Exceptions
Station Equations
Conflicting utilities, lighting or drainage
Signal Pole Location
Type and location of loops
Type and location of signal heads
Pedestrian Signal
Location of Stop Bars
Location of Pedestrian Crosswalks
Sheet Title
Applicable pay items
SIGNALIZATION PLANS - POLE SCHEDULE
Pole location, number, type
Pole dimensions
Pay item number and quantity
Joint use pole details, if applicable
Foundation design

SIGNALIZATION PLANS - INTERCONNECT/COMMUNICATION CABLE PLAN
Placement of interconnect/communication cable
Conflicting utilities, lighting or drainage
Other project specific details

ITS PLANS - KEY SHEET
Financial Project ID
(Federal Funds) notation, if applicable
State Road Number
County Name
FDOT Project Manager's Name
Begin/end stations & exceptions
Station Equations (if location map is shown)
Engineer of Record
Consultants name & address, if applicable

ITS PLANS - TABULATION OF QUANTITIES
Project Specific

ITS PLANS - PLAN SHEETS
Project Specific, but must include:
North arrow and scale
Basic Roadway Geometrics
Begin/End Stations and Exceptions
Station equations
Conflicting utilities, lighting or drainage
Applicable pay items

ITS PLANS - DETAIL SHEETS
Project Specific

LIGHTING PLANS - KEY SHEET
Financial Project ID
(Federal Funds) notation, if applicable
State Road Number
County Name
FDOT Project Manager's Name
Begin/end stations & exceptions
Station Equations (if location map is shown)
Engineer of Record
Consultants name & address, if applicable

LIGHTING PLANS - TABULATION OF QUANTITIES
Project Specific

LIGHTING PLANS - POLE DATA AND LEGEND SHEET
Each pole by number with location, arm length, mounting height and luminaire wattage noted.
Design value for light intensities and uniformity ratios shown.
Legend and sheet title

LIGHTING PLANS - PLAN SHEETS
North arrow and scale
Basic Roadway Geometrics
Begin/End Stations and Equations
Station Equations
Conflicting utilities, drainage, signal poles, etc.
Sheet title
Applicable pay items
Pole symbols shown at correct station location and approximate offset

LIGHTING PLANS - HIGH MAST
Foundation detail sheets (project specific)
Boring data sheets (project specific)
Conflicting utilities, drainage, lighting
LANDSCAPE PLANS - KEY SHEET
Financial Project ID
(Federal Funds) notation, if applicable
Fiscal year and sheet number
State Road Number
County Name
FDOT Project Manager’s Name
Begin/end stations & exceptions
Station Equations (if location map is shown)
Landscape Architect of Record name and registration number
Consultants name, address, and contract number, if applicable
Index of landscape plans

LANDSCAPE PLANS - TABULATION OF QUANTITIES AND PLANT SCHEDULE
Project Specific

LANDSCAPE PLANS - TABULATION OF QUANTITIES AND SCHEDULE FOR IRRIGATION AND SITE AMENITIES
Project Specific

LANDSCAPE PLANS - PLANTING PLAN SHEETS
Project centerline
Edge of pavement (edge of traffic lanes)
Curbs or curb and gutter
Drainage systems
Guardrails
Right of way and/or limited access fence line
Sidewalks or other planned or existing structures
Lighting, signs, and signal poles
Intersections and driveways which are noted in the plans
Existing and proposed overhead and underground utility locations
Clear Zone/Lateral offset (should be plotted or safety setback distances noted frequently on each plan sheet)
View zones for permitted outdoor advertising signs
Canopy limits
Existing vegetation (to remain or be removed)

LANDSCAPE PLANS – PLANTING PLAN SHEETS (con’t)
Existing off site features and conditions that affect or are affected by the project
Fence and gate locations
Setbacks from structural elements or drainage system
Limits of clear sight
Transit facilities
Proposed Planting Plan (Plant symbols and Plant quantities)

LANDSCAPE PLANS - IRRIGATION PLAN SHEETS
(if applicable)
Type of system
Location and size of mainlines and lateral lines
Type and location of spray heads and rotors
Type and location of valves, sleeves, controllers, water sources/point of connection, backflow preventers, and isolation valves

LANDSCAPE PLANS – DETAILS SHEET
Applicable landscape details
Irrigation symbology with associative descriptions (if applicable)
2.3.2.3 Phase III Plans Submittal

Typically, the remaining work to be done is to address Phase II comments, complete quantity calculations, update the Financial Management (FM) system, and provide final drainage tabulations.

Estimate the Work Zone Traffic Control items paid for on a 'per day' basis and include them in the Phase III submittal. The FDOT construction office will perform a biddability review and will establish construction duration as a part of the Phase III review after receiving the plan set. This information should be included in the Phase III review comments transmitted back to the EOR.

Utility Work by Highway Contractor (UWHC) Agreement Plans, consisting of a key sheet, and mainline plan-profile showing proposed utility horizontal and vertical locations, are also to be included in the Phase III submittal.

Review comments must be provided to the EOR for incorporation of the comments into the plans. When the review comments have been resolved and documented by the designer, the plans are ready to proceed to completion.

2.3.2.4 Phase IV Plans Submittal

The plans are considered final (Phase IV Plans) when:

- Corrections noted during the Phase III submittal review are complete,
- Work Zone Traffic Control pay items have been revised based on the established construction duration,
- The assigned Construction Contract number is placed on the Key Sheet(s),
- The cost estimate is complete.

Typically there are two submittals after Phase IV – Specifications (First Mail) and Plans Processing (Second Mail)/CD Submittal. Plans are digitally signed & sealed prior to Plans Processing (Second Mail)/CD Submittal.
2.3.3 Roundabout Review Submittal

Roundabout designs require the approval by the State Roadway Design Engineer. Provide a Roundabout Submittal Package to Central Office Roadway Design for review as early in the design process as practical.

The Roundabout Submittal Package includes the following:

1. Plan sheets (PDF and CADD)
   - Key Sheet with location map
   - Roundabout typical sections
   - Roundabout layout, including:
     o dimensions for all major geometric components including splitter islands, circulatory roadway, truck apron, central island, bypass lanes, landscape buffers, sidewalks/multi-use paths, cross walks, bicycle bail-out ramps, etc.
     o existing and proposed right of way lines
     o significant topographic features including buildings, driveways, drainage structures, utilities, bicycle, pedestrian, and transit facilities.

2. Traffic Forecast for Design Year (PDF), including:
   - AM and PM peak hourly through and turning volumes
   - AM and PM peak pedestrian crossing movements
   - Peak hour factor
   - Percentage of heavy vehicles
   - Volume distribution across lanes for multi-lane entries

3. Operational Analysis input and output (PDF)

4. Fastest Path Speed Checks in accordance with NCHRP 672 Section 6.7.1 (PDF and CADD)

5. Swept Path of the Design Vehicle in accordance with NCHRP 672 Section 6.7.2 (PDF and CADD)

6. Sight Distance Checks in accordance with NCHRP 672 Section 6.7.3 (PDF and CADD)
Central Office Roadway Design will provide review comments and schedule a meeting with the project team to resolve any issues. When the agreed to changes to the design have been verified, an approval memorandum will be issued by the State Roadway Design Engineer.

2.4 Design-Build Phase Submittals

Section 2.4 applies exclusively to Design-Build projects.

2.4.1 General

Requirements relating to the design process for various submittals are given in Chapter 16, Volume 1 of this manual. Refer to that chapter for additional guidance in preparing submittals for review by the Department.

For bridge submittal requirements see Chapter 26, Volume 1.

2.4.2 Phases

The remainder of this section outlines, in detail, the sequence for contract plans preparation and assembly, as well as the information required to be presented on the various plan sheets which are included in phase submittals.

For Design-Build projects, the standard submittal phases are as follows:

SUBMITTAL PHASES

- Technical Proposal
- 90% Component Plans
- Final Component Plans

Figure 2.2 summarizes the plans sheet status required for each submittal.

The technical accuracy required for the design is the responsibility of the Engineer of Record. Prior to submitting the plans for a formal FDOT Phase review, the design organization (in-house, consultant, or Design-Build Firm) must conduct an internal Quality Control (Q/C) review to ensure technically correct and complete plans. Any revisions or corrections noted during the Q/C review must be incorporated into the plans before submittal for the formal Phase review.
When deemed necessary by the Engineer of Record, or as requested by the Department, phase submittals may include an additional plan sheet titled "Notes for Reviewers". This sheet is placed as the second sheet in the submittal package. It contains information pertinent to design criteria and special project requirements, as well as other details or notes which call the reviewer's attention to issues and features unique to the project design. The sheet is to be used only in the review process and is not included in the final plans.
### Figure 2.2 Summary of Design-Build Phase Submittals

Provide the sheets listed as applicable

2.4.2.1 Requirements for Technical Proposal Submittal

For the Technical Proposal only, the Design Build team must submit a complete set of 11” X 17” plan sheets. As a supplement to the plan set, the team may submit select plan sheets no larger than 24” X 36” or roll plot(s) no larger than 24” X 96”. Supplemental plan sheets or roll plots are desirable for such roadway features that cannot be presented adequately on 11” X 17” sheets, such as complex interchanges, Maintenance of Traffic phases and large complex intersections. Unless otherwise directed by the Department, the following elements are required for a Technical Proposal Submittal:

DRAINAGE MAP - PLAN VIEW
- Drainage divides and flow direction arrows
- High water information as required
- Preliminary horizontal alignment with stationing
- State, Federal, County highway numbers (as appropriate)
- Proposed storm drain trunk line and outfall locations
- Proposed Retention/Detention Pond Locations

INTERCHANGE DRAINAGE MAP - PLAN VIEW
- Preliminary interchange drainage with drainage areas and flow direction arrows

TYPICAL SECTIONS
- Mainline and crossroad typical sections
- R/W lines
- Traffic data
- Pavement Design

PROJECT CONTROL
- Benchmarks
- Reference Points
- Control Points

PLAN AND PROFILE - PLAN VIEW
- North arrow and scale
- Baseline of survey, equations
- Curve data (including superelevation)
- Existing topography including utilities
- Preliminary horizontal geometrics/dimensions
- Existing & proposed R/W lines (if available)
- Centerline of construction (if different from the baseline of survey)

PLAN AND PROFILE - PLAN VIEW (con’t)
- Begin and end stations for the project and stations of equations and exceptions
- Existing utilities
- Guide sign locations
- Limits of wetlands

PLAN AND PROFILE - PROFILE VIEW
- North arrow and scale
- Appropriate existing utilities
- Preliminary profile grade line
- Existing ground line with elevations at each end of sheet
- Begin and end stations for the project and stations of equations and exceptions
- Final profile grades and vertical curve data
- High water elevations

TRAFFIC MONITORING SITE
- Project Specific

INTERCHANGE LAYOUT
- Curve data including superelevation and design speed
- Stationing and ties
- Access and/or frontage roads with dimensions and R/W
- Ramp identification
INTERSECTION LAYOUT
North arrow and scale
Existing topography (if applicable)
Proposed R/W limits
Length of turn lanes
Geometric dimensions (radii, offsets, widths)
Limits of proposed construction along side roads

TEMPORARY TRAFFIC CONTROL PLANS
Project specific
Other worksheets as necessary to convey concept and scope
Preliminary traffic control plan
Detour plan
Phasing plan
R/W – existing and additional if required

SIGN DETAIL SHEETS
Preliminary layout of multi-column and overhead guide sign worksheets

TOLL FACILITY PLANS
Site/Civil
Architectural
Structural
2.4.2.2 Requirements for 90% Plans Component Submittal

Unless otherwise directed by the Department, the following elements are required for a 90% Plans Component Submittal:

**KEY SHEET**
Location Map w/ location of project on map
All applicable Financial Project ID's
(Federal Funds) notation, if applicable
Exceptions & Equations
County Name
State Road Number
Length of project box
North arrow and scale
Approval signature lines
Railroad crossing (if applicable)
Revision box
Governing Standards & Specifications dates
Project Manager's Name
Begin & end project station and begin mile post
Begin & end bridge stations
Consultant's name, address, contract number,
Certificate of Authorization number and vendor number (if applicable)
Index of sheets
Contract plans and component plans list

**SIGNATURE SHEET**
(Signature Sheet is not part of the Classical Electronic Delivery)
Sections for each Professional of Record
Index of sheets for each Professional of Record
Image of the seal(s)
(Note: Digital Signatures are not to be applied in this Phase)

**DRAINAGE MAP – PLAN VIEW**
Begin & end stations of project, bridge, bridge culverts & exceptions
Existing structures & pipes with relevant information
Proposed structures with structure numbers
Proposed storm drain pipes
Flow arrows along proposed ditches
Retention/Detention ponds, pond number and area size
Cross drains with pipe sizes and structure numbers
Bridges/bridge culverts with begin and end stations
Flood data (if applicable)
State, Federal, county highway numbers (as appropriate)

**DRAINAGE MAP – PROFILE VIEW**
Horizontal & vertical scale
Begin & end stations of project, bridges, bridge culverts & exceptions
Equations
Ditch gradients including DPIs
Final roadway profile grade line
Mainline storm drain pipes
Mainline flow line elevations
Mainline structures with structure numbers and pipes
Bridge, Bridge Culvert
Cross drains with pipe sizes, structure numbers and flow line elevation

**INTERCHANGE DRAINAGE MAP**
North arrow and scale
Stationing along baselines
Ramp baselines with nomenclature
Begin and end bridge stationing
Final interchange configuration
R/W lines
INTERCHANGE DRAINAGE MAP (con’t)
Final interchange drainage with drainage areas and flow direction arrows
Final geometrics including PC and PT
Proposed structures with structure numbers
Proposed storm drain pipes
Special ditches with DPI and elevation

TYPICAL SECTIONS
Mainline and crossroad typical sections
R/W lines
Special details (bifurcated sections, high fills, etc.)
Traffic data
Pavement Design

DRAINAGE STRUCTURES
Vertical and horizontal scale
Roadway template with profile grade elevation
Underground utilities
Special sections at conflict points
R/W lines (at critical locations)
Storm drain construction notes
Flow arrows
Applicable notes
Structure numbers and location station along right side of sheet
Drainage structures with numbers in numerical order, type, size, location and flow line elevations

PROJECT LAYOUT
Plan-profile sheet sequence (mainline and crossroads)

PROJECT CONTROL
Complete

ROADWAY PLAN PROFILE - PLAN VIEW
North arrow and scale
Baseline of survey, equations
Curve data (including superelevation)
Existing topography including utilities
Preliminary horizontal geometrics/dimensions
Existing & proposed R/W lines (if available)
Centerline of construction (if different from the baseline of survey)
Begin and end stations for the project, bridges, bridge culverts and exceptions

ROADWAY PLAN PROFILE - PROFILE VIEW
Reference points (if project survey control sheet not included in plans set)
Curb return numbers, station ties and elevations
Proposed drainage structures with structure nos.
Proposed R/W lines
Existing utilities
Limits of wetlands
Flood data if not shown elsewhere
Proposed side drain pipe requirements (including size) for access and intersections
Final geometrics and dimensions including radii, station pluses, offsets, widths, taper/transition lengths, curve data
General notes (if project layout sheet not included)

ROADWAY PLAN PROFILE - PROFILE VIEW
Begin and end stations for the project and stations of equations and exceptions
Existing ground line with elevations at each end of sheet
Final profile grades and vertical curve data
High water elevations
Appropriate existing utilities
Mainline storm drain pipes
Proposed special ditches
Ditch gradients with DPI station and elevation
Non-standard superelevation transition details
High water elevations
Mainline drainage structures with structure numbers
Cross drains with structure number, size and flow line elevations

TRAFFIC MONITORING SITE
Project Specific

SPECIAL PROFILE
Scale
Existing ground line of intersections
Final intersection profile grades
Final curb return profiles (if applicable)
Superelevation diagrams as required
Final ramp profile grades including nose sections
SPECIAL PROFILE (con’t)
Final access and frontage road profiles (may contain one or more types of special profiles.)

BACK-OF-SIDEWALK PROFILE
Scale
Begin and end project stations
Begin and end sidewalk stations
Cross-street locations and elevations
Drainage flow direction arrows
Mainline equations
Existing driveway locations and details
Super-elevation details
Back-of-sidewalk profile grades and vertical curve information
Building floor elevations with offset distance left and right
Grade line notation: Specifically the numeric difference relative to roadway profile grade line

INTERCHANGE LAYOUT
North arrow and scale
Quadrant Identification
Ramp Labels
Schematic of traffic flow and volumes
Proposed bridge limits
R/W lines
Final configuration and geometrics
Curve data including super-elevation and design speed
Coordinate data, stationing and ties
Access and/or frontage roads with dimensions and R/W
Fence location

RAMP TERMINAL DETAILS
Ramp identification
Final geometrics
Radii, transition/taper lengths

INTERSECTION LAYOUT
North arrow and scale
Existing topography (if applicable)
Proposed R/W limits
Length of turn lanes
Taper lengths
Existing Utilities
Geometric dimensions (radii, offsets, widths)

INTERSECTION LAYOUT (con’t)
Limits of proposed construction along side roads
Applicable notes
Cross drains with structure numbers and pipe sizes
Storm drain pipes including sizes
Final geometrics including dimensions, radii, offsets, station plus and taper/transition lengths

THREE-SIDED/BOX CULVERT DETAILS
Complete

OUTFALL / LATERAL DITCH SYSTEM - PLAN VIEW
North arrow and scale
Roadway centerline
Existing and/or survey ditch centerline
Proposed ditch centerline with stationing
Begin and end ditch stations
Equations
Ditch centerline intersection stations
R/W lines
Bearings of ditch and mainline centerlines
Proposed storm drain pipes
Ditch PI stations with deflection angle left or right
Proposed drainage structures with structure numbers
Existing topography, drainage structures, utilities
Limits of wetlands

OUTFALL / LATERAL DITCH SYSTEM - PROFILE VIEW
Bench mark information
Scale
Existing ground line
Proposed ditch profile with grades
Begin and end ditch stations
High water elevations
Proposed storm drain pipes with size
Existing Utilities
Overland flow or overtopping elevations
Proposed drainage structures with structure numbers
Typical section can be placed in either plan or profile
LATERAL DITCH CROSS SECTIONS
Horizontal and vertical scale
Existing ground line
Station numbers
Survey centerline and elevation
R/W
Begin and end ditch stations
Begin and end excavation stations
Existing utilities
Proposed template with ditch bottom elevation

RETENTION/DETENTION POND DETAILS
North arrow and scale
Roadway centerline ties
Proposed pond centerline with stationing
Begin and end pond stations
Side slopes, dimensions, and elevations
R/W lines
Berm, fence and gate locations
Soil boring information
Proposed pond drainage structures with structure numbers
Existing topography, drainage structures, utilities
Pond sections (2 perpendicular to each other)
Pond Typical Section
Limits of wetlands

RETENTION/DETENTION POND CROSS SECTIONS
Horizontal and vertical scale
Existing ground line
Station numbers
Begin and end pond stationing
Pond centerline and elevations
R/W
Soil borings
Water table
Extent of unsuitable material
Earthwork quantities
Existing utilities
Proposed template with bottom elevation

ROADWAY SOIL SURVEY
Soil data
Project specific

CROSS SECTIONS
Scale
Existing ground line
Existing survey baseline elevations
Station numbers
Baseline of survey labeled
Existing utilities
Proposed template with profile grade elevations along mainline and cross-streets as necessary

TEMPORARY TRAFFIC CONTROL PLANS
Project specific
Other worksheets as necessary to convey concept and scope.
Final traffic control plan
Detour plan
Phasing plan
R/W - existing and additional if required
Existing Utilities

UTILITY ADJUSTMENTS
All existing utilities highlighted

SELECTIVE CLEARING AND GRUBBING
Limits of construction by station and type of selective clearing and grubbing

MITIGATION PLANS
Project Specific

MISCELLANEOUS STRUCTURES PLANS
Retaining walls (Cast in place, proprietary, temporary) if required

SIGNING AND PAVEMENT MARKING PLANS - KEY SHEET
Financial Project ID
(Federal Funds) notation, if applicable
State Road Number
County Name
FDOT Project Manager's Name
Begin/end stations & exceptions
Station Equations (if location map is shown)
Engineer of Record
Consultants name & address, if applicable
SIGNING AND PAVEMENT MARKING PLANS - PLAN SHEETS
North arrow and scale
Basic Roadway Geometrics
Begin/End Stations and Exceptions
Station equations
Conflicting utilities, lighting or drainage
Pavement markings
Sign locations

SIGNING AND PAVEMENT MARKING PLANS - SIGN DETAIL SHEETS
GUIDE SIGN WORK SHEETS
Project Specific

SIGNALIZATION PLANS - KEY SHEET
Financial Project ID
(Federal Funds) notation, if applicable
State Road Number
County Name
FDOT Project Manager's Name
Begin/end stations & exceptions
Station Equations (if location map is shown)
Engineer of Record
Consultants name & address, if applicable

SIGNALIZATION PLANS - PLAN SHEET
North arrow and scale
Basic Roadway Geometrics
Begin/End Stations and Exceptions
Station equations
Conflicting utilities, lighting or drainage
Signal Pole Location
Type and location of loops
Type and location of signal heads
Pedestrian Signal
Location of Stop Bars
Location of Pedestrian Crosswalks
Sheet Title

SIGNALIZATION PLANS - POLE SCHEDULE
Pole location, number, type
Pole dimensions
Joint use pole details, if applicable
Foundation design

SIGNALIZATION PLANS - INTERCONNECT/COMMUNICATION CABLE PLAN
Placement of interconnect/communication cable
Conflicting utilities, lighting or drainage
Other project specific details

ITS PLANS - KEY SHEET
Financial Project ID
(Federal Funds) notation, if applicable
State Road Number
County Name
FDOT Project Manager's Name
Begin/end stations & exceptions
Station Equations (if location map is shown)
Engineer of Record
Consultants name & address, if applicable

ITS PLANS - PLAN SHEETS
Project Specific, but must include:
North arrow and scale
Basic Roadway Geometrics
Begin/End Stations and Exceptions
Station equations
Conflicting utilities, lighting or drainage

ITS PLANS - DETAIL SHEETS
Project Specific

LIGHTING PLANS - KEY SHEET
Financial Project ID
(Federal Funds) notation, if applicable
State Road Number
County Name
FDOT Project Manager's Name
Begin/end stations & exceptions
Station Equations (if location map is shown)
Engineer of Record
Consultants name & address, if applicable

LIGHTING PLANS - POLE DATA AND LEGEND SHEET
Each pole by number with location, arm length, mounting height and luminaire wattage
Design value for light intensities and uniformity ratios shown
Legend and sheet title
LIGHTING PLANS - PLAN SHEETS
- North arrow and scale
- Basic Roadway Geometrics
- Begin/End Stations and Equations
- Station Equations
- Conflicting utilities, drainage, signal poles, etc.
- Sheet title
- Pole symbols shown at correct station location and approximate offset

LIGHTING PLANS - HIGH MAST
- Foundation detail sheets (project specific)
- Boring data sheets (project specific)
- Conflicting utilities, drainage, lighting

LANDSCAPE PLANS – KEY SHEET
- Financial Project ID
- (Federal Funds) notation, if applicable
- Fiscal year and sheet number
- State Road Number
- County Name
- FDOT Project Manager’s Name
- Begin/end stations & exceptions
- Station Equations (if location map is shown)
- Landscape Architect of Record name and registration number
- Consultants name, address, and contract number, if applicable
- Index of landscape plans

LANDSCAPE PLANS – PLANTING PLAN SHEETS
- Project centerline
- Edge of pavement (edge of traffic lanes)
- Curbs or curb and gutter
- Drainage systems
- Guardrails
- Right of way and/or limited access fence line
- Sidewalks or other planned or existing structures
- Lighting, signs, and signal poles
- Intersections and driveways which are noted in the plans
- Existing and proposed overhead and underground utility locations
- Clear Zone/Lateral offset (should be plotted or safety setback distances noted frequently on each plan sheet)

LANDSCAPE PLANS – PLANTING PLAN SHEETS (con’t)
- View zones for permitted outdoor advertising signs
- Canopy limits
- Existing vegetation (to remain or be removed)
- Existing off site features and conditions that affect or are affected by the project
- Fence and gate locations
- Setbacks from structural elements or drainage system
- Limits of clear sight
- Transit facilities
- Proposed Planting Plan

LANDSCAPE PLANS - IRRIGATION PLAN SHEETS
- Type of system
- Location and size of mainlines and lateral lines
- Type and location of spray heads and rotors
- Type and location of valves, sleeves, controllers, water sources/point of connection, backflow preventers, and isolation valves

LANDSCAPE PLANS – DETAILS SHEET
- Applicable landscape details
- Irrigation symbology with associative descriptions (if applicable)
2.4.2.3 Final Plans Submittal

Ordinarily, the only other remaining work to be done will be to comply with comments received as a result of the 90% review.

All plan sheets and the Financial Management (FM) system must be updated. Final drainage tabulations must also be furnished for review.

Utility Work by Highway Contractor (UWHC) Agreement Plans, consisting of a key sheet, and mainline plan-profile showing proposed utility horizontal and vertical locations, are also to be included in the Final submittal.

A "marked up" set of the plans and review comments must be returned to the EOR for incorporation of the comments into the plans. When the review comments have been resolved and documented by the designer, the plans are ready to proceed to completion.

2.4.2.4 Released For Construction Plans

After all corrections noted in the Final Plans submittal have been satisfactorily resolved as determined by the Department, the Department’s Project Manager will initial, date and stamp each submittal as “Released for Construction”. Only signed and sealed plans stamped “Released for Construction” by the Department’s Project Manager are valid. All work performed by the Design-Build Firm prior to the Department’s release of Plans will be at the Design-Build Firm’s risk.
