Chapter 20

Utility Adjustments

20.1 General

The purpose of utility adjustment sheets is to provide coordination between the contractor and the affected utility companies. These sheets show the contractor the approximate locations of existing, proposed and relocated utilities, and thus aid the contractor in avoiding possible conflicts or damage to the utilities involved. Projects with minor utility work or impacts may include these features on the roadway plan or plan-profile sheets or appropriate component plan sheets.

20.2 Required Information

Show locations of existing and proposed utilities within the project limits. Clearly show and label all proposed and relocated utilities on the plans using lines and standard utility symbols (see Design Standards, Index No. 002 and the FDOT CADD Manual). Clearly indicate the disposition of existing utilities that are not to remain in place and in service (for example "To Be Removed", "To Be Adjusted", "To Be Relocated", etc.). The disposition of existing utilities that are to remain in place and in service need not be labeled. Label all proposed utilities appropriately. Show the line voltage for all overhead electrical power lines.

Place the following notes on the first Utility Adjustment Sheet. Include these notes in the General Notes (see Exhibit GN-1 in Chapter 10 of this Volume) if there are no utility adjustment sheets in the plans.

1. The location(s) of the utilities shown in the plans (including those designated Vv, Vh and Vvh) are based on limited investigation techniques and should be considered approximate only. The verified locations/elevations apply only at the points shown. Interpolations between these points have not been verified.
2. Utility/Agency Owners:

<table>
<thead>
<tr>
<th>Company</th>
<th>Contact</th>
<th>Telephone Number</th>
</tr>
</thead>
</table>

The provided company names and phone numbers are for emergency utility contacts. Also include the contact information for persons responsible for the maintenance of FDOT utility infrastructure such as traffic counters, lighting, signal components, and ITS.

Include the Transportation Statistics Office in Tallahassee in the list of Utility/Agency Owners if there is a traffic-monitoring site on the project or within one-half mile of the construction. The contact person is the Traffic Data Section Manager. Refer to Section 10.2.6, Item No. 13 of this Volume for plan requirements involving traffic-monitoring sites.
20.3  Sheet Format

Prepare the utility adjustment sheets from CADD files generated for the plan or plan-profile sheets, and only the plan portion should be shown. Use levels, fonts and line weights in accordance with the *FDOT CADD Manual*.

Information and graphic data that is not necessary for utility adjustment sheets may be removed by turning off the appropriate level(s) on which the data is stored. This will help ensure that information pertinent to utility adjustments is more easily seen. Show the following information on the utility adjustment sheets as a minimum:

1. Baseline and/or centerline of survey.
2. Curb and gutter or edge of pavement.
3. Drainage structures (existing and proposed).
4. Right of way lines.
5. Station numbers.
6. Street names.
7. Location of existing utilities. Label all major utilities that have been field verified (see *Quality Level "A" locates, Chapter 5* of Volume 1) in accordance with the following symbol:

   \[ V_{vh} = \text{Verified Vertical Elevation and Horizontal Location} \]

   At the District's option, a table of field verified utilities containing the following information can replace the profile view on each sheet:

<table>
<thead>
<tr>
<th>( V_{vh} ) No.</th>
<th>Utility Description (Owner, Type)</th>
<th>Size</th>
<th>Material</th>
<th>B/L and/or C/L</th>
<th>Existing Ground Elevation</th>
<th>Top Elevation</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Station</td>
<td>Offset</td>
<td>Lt./Rt.</td>
<td></td>
</tr>
</tbody>
</table>

8. Disposition of existing utilities that are not to remain in place and in service.
9. Location of new or relocated utilities.
