Description:

Provide all labor, materials, equipment, and incidentals necessary to perform Subsurface Pressure Grouting and Shallow Subsurface Polyurethane Injection. The Subsurface Pressure Grouting program is to improve the subsurface conditions by injecting cement grout to fill voids and densify the soils as noted in a CGIP to minimize the potential for future ground subsidence. The Shallow Subsurface Polyurethane Injection will be used at drainage structures, drainage pipes, box culverts, asphalt and concrete pavement areas, sidewalk areas and bridge approach slabs for the purpose of densification of subgrade, filling voids, sealing drainage structures and realignment of surfaces. EXPERIENCE IN SUBSURFACE PRESSURE GROUTING (FORM 850-070-05) MUST BE COMPLETED AND SUBMITTED WITH THE BID. RENEWAL OPTION. BID EXPRESS MANDATORY.
