**Description:**

This is a work document driven contract whereby the Department can provide emergency/quick response for resolving unexpected problems concerning signalization, signing, pavement markings, and minor concrete improvements for a period of two (2) years or until the contracted amount has been reached. Examples of work documents include (but is not limited to) the installation of temporary signal poles after a vehicle vs pole crash, minor signal repairs, emergency signal cabinet replacements, installing flashing beacons on warning signs, installing APS features, installing/replacing signal backplates, and other fast response/ emergency needs in the District. The number of work documents for the contract will be limited by a budgetary cap of \$250,001. See Ad, Specs (including appendixes) for details.

The quantities shown on the Bid Price Proposal are approximate and only represent estimated planned requirements based on historical or specific project needs. The Department does not guarantee any maximum or minimum quantity, any range of quantities, or the exact quantities shown for each bid item. The Departments estimated quantities and the Contractors bid price will be used to calculate a total bid amount. This total bid amount will then be used to determine the low bidder; however, actual payment under the awarded contract will be based on actual quantities completed. For this Contract in which specific sites are not identified at the time of letting, the Engineer will issue a Work Document. Work Documents will identify the location, description, amount of work to be accomplished, and the number of calendar days to complete the work.
