Section 14.2, Presenting the Technical Proposal, has been revised to alleviate any confusion regarding the font size to be used.

14.2 Presenting the Technical Proposal

Construct the Technical Proposal using 8½" x 11" paper. One sheet of the Technical Proposal may consist of a larger foldout page (11" x 17"); this larger page may be utilized at the Proposer's discretion within any section of the Technical Proposal. Use a type size of twelve (12) point or larger Times New Roman font. This font limitation does not apply to the cover page, table of contents, and logo. Use margins no less than 1" at top and 1/2" at bottom and sides. In the language of the Technical Proposal, do not use ambiguous words such as may, might, should, etc.; use only definitive statements of what the Proposer will or will not accomplish. The entire Technical Proposal is limited to a maximum of 10 total pages, not counting bindings, covers, and table of contents. Sequentially number all pages. A page with information on both sides is considered two pages. ~~It is recognized that existing financial reports, documents, or brochures, such as those that delineate the Proposer's general capabilities and experience, may not comply with the prescribed format. It is not the intent to have these documents reformatted and if used, they will be acceptable in their existing form.~~ Include all relevant material for each section with the appropriate sections; do not include any appendices, exhibits, resumes, or information in any form outside of the Section appropriate for that information.
