There are two alternates referenced in the Technical Specifications and Contract Plan Set. Alternate 1 is the in-fill of the walker duct system (Technical Specifications, Section 01010, Summary of Work, 1.02A, page 01010-2). Alternate 2 is the reuse of existing light fixtures (Contract Plan Set, Partial Lighting Plan, Drawing Number E111, Note). The Bid Proposal should include the base bid and the two alternates.
