

Bid Questions and Answers Report

Date & Time:

3/27/2019 8:38:38 AM

District Address: District 1 Construction Office, located at 801 N Broadway, Bartow, FL 33830

District Phone: (863) 519-2222

Proposal: T1744

Project: 438061-1-52-01

Letting Date: 3/27/2019

Location: CENTRAL OFFICE

Description: SR 80

Question:	24808: The plans for this project show span wire mounted video detection cameras. This requires a special camera which only one vendor supplies. Is it possible to use another vendor with standard cameras and mount them from the poles?	Posted:	2/13/2019 3:33:59 PM
Answer:	No. The Department has made the determination that video detectors that are strategically located on the span per plan will provide the best possible detection zone outcome, which will subsequently reduce false or missed calls. Please provide and price the camera as shown within the contract plans.	Status:	ANSWER PUBLISHED

Question:	24878: Contradiction b/w the 'Lane Closure Notes' on p76 & the Traffic Control Typ P78. Notes state no lane closures except 9A to 4P or night 7P until 6A & all-night work b/w 6:30P to 6:30A in intersections. The TTCP notes & typ sections show removing conflicting pvmt mkgs in each Phase & closing all but 1 lane ea direction in Ph I & all but 1 lane in each direction plus the left turn lanes at the inters. Since the existing conflicting mkgs are to be removed, these configurations must be re-marked & would exist at all times until switching to the next phase, then those mkgs would be removed & re-marked for Phase II. The notes say to remove all conflicting mkgs but there are no quantities shown in the plans to replace the mkgs to place traffic in the configurations as on Pg 78 for Ph I & Ph II. The item for 'Final Pvmt Mkgs' will not cover the traffic switching as the notes also say to place the final pvmt surface & final pvmt mkg upon completion of each phase. This will not work. Advise.
