Description:

The budgetary ceiling for this Contract shall be \$4,000,000.

The quantities shown on the Bid Price Proposal are approximate and only represent estimated planned requirements based on historical or specific project needs. The Department does not guarantee any maximum or minimum quantity, any range of quantities, or the exact quantities shown for each bid item. The Department's estimated quantities and the Contractor's bid price will be used to calculate a total bid amount. This total bid amount will then be used to determine the low bidder; however, actual payment under the awarded contract will be based on actual quantities completed. For this Contract in which specific sites are not identified at the time of letting, the Engineer will issue a Work Document. Work Documents will identify the location, description, amount of work to be accomplished, and the number of calendar days to complete the work.

The improvements under this District Wide Safety Push-Button Contract consist of a means whereby the Department can provide a quick response for providing safety improvements for a period of two years. However, any project issued shall be concluded within the terms of this contract. Under this contract the type of expected work will be: turn lane additions, intersection improvements, signals, signing and pavement markings, pedestrian facilities, ADA improvements, school zone improvements, lighting and high friction course applications. For any type of work, the construction duration time will be established based on the task work order at the time it is issued.
