SUBJECT: ***Standard Plans Interim Revision (IR700-010-1), Single Column Ground Signs***

This bulletin announces the release of ***Standard Plans, Interim Revision IR700-010-1*** which updates the details for flip signs in the ***FY 2022-23 Standard Plans, Index 700-010 (Single Column Ground Signs)***.

### REQUIREMENTS

***Standard Plans, Index 700-010*** has been updated and is released as a ***Standard Plans Interim Revision (IR 700-010-1)*** to the ***FY 2022-23 Standard Plans***.

The Interim Revision will replace the original version of the Index published on October 27, 2021; therefore, a reference to the Interim Revision is not required on the Key Sheet under the Governing Standard Plans.

### **COMMENTARY**

This *Standard Plans Interim Revision* replaces the “Wind Beam Connection for Flip Up Sign” details (Sheet 7) with a new flip down sign design and new latch details on Sheet 8. All remaining sheets of *Standard Plans, Index 700-010* are renumbered to coincide with the addition of the new Sheet 8.

The hinged flip signs are primarily used for emergency management (evacuation/shelter routes and emergency shoulder use).

### **IMPLEMENTATION**

This change is effective on projects with a letting on or after July 1, 2022. These requirements may be implemented immediately at the discretion of the Districts.
