<tbody>
<tr>
<td>Length</td>
<td>Dist (ft.)</td>
<td>L (ft.)</td>
</tr>
</tbody>
</table>

General Notes

1. Work operations shall be confined to the two outside traffic lanes, leaving the adjacent lane(s) open to traffic.
2. On undivided highways the median signs as shown are to be omitted.
3. When work is performed in the median lane on divided highways, the channelizing device plan is inverted and left lanes closed and lane ends signs substituted for the right lanes closed and lane ends.
4. When a side road intersects the highway within the TTC zone, additional TTC devices shall be placed in accordance with other applicable TTC Indexes.
5. For general TCZ requirements and additional information, refer to Index 102-600.
6. When paved shoulders having a width of 8 ft. or more are closed, channelizing devices shall be used to close the shoulder in advance of the merging taper to direct vehicular traffic to remain within the travel way. See Index 102-612 for shoulder taper formulas.

Duration

Temporary white edgeline may be omitted for work operations less than three (3) days.

Conditions

Where any vehicle, equipment, workers or their activities encroach on the two lanes adjacent to either shoulder.
