4. *Fabricate pickets and vertical panel elements parallel to the posts; except Type 2, 3 and 5 panel infills may be fabricated parallel to the longitudinal grade. Maintain a maximum clear opening of 5⅞" for standard installations and 3⅞" when a 4" sphere requirement is indicated in the Data Tables.*
5. *Maximum spacing between expansion joints is 40'-0". Locate an Expansion Joint between the posts on either side of the Deck Expansion Joint.*
6. *Field splices are similar to the Expansion Joint Detail and may be approved by the Engineer to facilitate handling; but the top rail must be continuous across a minimum of two posts.*
7. *For intermediate and bottom horizontal rails, the screwed joints shown may be substituted with alternate joints shown in detail "K".*
8. *Make corners and changes in tangential longitudinal alignment with a 9" bend radius or terminate adjoining sections with mitered end sections when handrails are not required.*
9. *For changes in tangential longitudinal alignment greater than 45', position posts a maximum of 2'-0" each side of the corner but not at the corner apex.*
10. *For curved longitudinal alignments, shop bend the top and bottom rails and handrails to match the alignment radius.*
11. *Handrails are required and must be continuous at landings for:*
    - *A. Grades Steeper than 5%,*
    - *B. Three or more steps*
12. *Installation: Cutting of reinforcing steel is permitted for post installed anchors.*
