NOTES:

1. Work with Index 634-001 for grounding and span wire details. See the Plans for clamp spacing, cable sizes and forces, signals and sign mounting locations and details.

2. Shop Drawings:
   This Index is considered fully detailed, only submit shop drawings for minor modifications not detailed in the Plans.

3. Materials:
   - A. Strain Pole and Backing Rings:
     a. Less than $\frac{f_y}{f_{y}}$: ASTM A1011 Grade 50, 55, 60 or 65
     b. Greater than or equal to $\frac{f_y}{f_{y}}$: ASTM A572 Grade 50, 55, 60 or 65
     c. ASTM A595 Grade A (55 ksi yield) or Grade B (60 ksi yield)
   - B. Steel Plates: ASTM A36
   - C. Bolt Metal: EN1090
   - D. Bolts, Nuts and Washers:
     a. High Strength Bolts, ASTM F3125, Grade A25, Type 1
     b. Nuts: ASTM A563 Grade DH Heavy-Hex
     c. Washers: ASTM A136 Type 1, one under turned element
   - E. Anchor Bolts, Nuts and Washers:
     a. Anchor Bolts: ASTM F1554 Grade 55
     b. Nuts: ASTM A563 Grade A Heavy-Hex (5 per anchor bolt)
     c. Plate Washers: ASTM A193 (2 per bolt). Split-lock washers and self-locking nuts are not permitted
   - F. Handhole Cover: ASTM A490 or ASTM A56, Grade 36
   - G. Foundation: Specification Section 455, except that payment is included in the cost of the strain pole.
   - H. Hot Dip Galvanize after fabrication.
   - I. Concrete: Class IV (Drilled Shaft) for all environmental classifications.

4. Construction:
   - A. Pole Taper: Change diameter at a rate of 0.14 inches per foot, round or 12-sided (Min.)
   - B. All other steel items ASTM A123
   - C. Provide bolt hole diameters as follows:
     a. Bolts (except Anchor Bolts): Bolt diameter plus $\frac{1}{16}$, prior to galvanizing
     b. Anchor Bolts: Bolt diameter plus $\frac{1}{2}$, maximum
   - D. Locate handhole 180° from 2" wire entrance pipe.
   - E. Identification Tag: (Submit details for approval)
     a. 2" x 4" (Max.) aluminum identification tag
     b. Locate on the inside of the pole and visible from the handhole
     c. Include the following information on the ID Tag:
        1. Financial Project ID
        2. Pole Type
        3. Pole Height
        4. Manufactures' Name
        5. Ty of Steel
        6. Base Wall Thickness
     d. Provide a 2" or "C" hook at the top of the pole for signal wiring support (See Sheet 3).
   - F. Anchor Bolts, Nuts and Washers:
     a. Anchor Bolts: ASTM F1554 Grade 55
     b. Nuts: ASTM A563 Grade DH Heavy-Hex
     c. Washers: ASTM F436 Type 1, one under turned element
     d. Locate on the inside of the pole and visible from the handhole.
   - G. Locate on the inside of the pole and visible from the handhole.
   - H. High Strength Bolts: ASTM F3125, Grade A325
   - I. Stainless Steel Screws: AISI Type 316
   - J. Threaded Bars/Studs: ASTM A36 or ASTM A207
   - K. Concrete: Class IV (Drilled Shaft) for all environmental classifications.
   - L. Reinforcing Steel: Specification Section 415

5. Coatings:
   - A. Strain Pole and Backing Rings:
     a. Less than $\frac{f_y}{f_{y}}$: ASTM A1011 Grade 50, 55, 60 or 65

6. Construction:
   - A. Foundation: Specification Section 455, except that payment is included in the cost of the strain pole.
   - B. After installation, place wire screen between top of foundation and bottom of baseplate in accordance with Specification Section 649-4.
### TABLE OF FACTORED FLEXURAL RESISTANCE $M_F$

**NOTE:**

1. Double nuts: Bottom nut may be half height 'Jam' Nut. Provide individual nut covers (Not Shown) for each bolt.
NOTE:
1. Clamps have been sized for Design Load Cases shown in the Clamp Thickness Table, and a Maximum Pole Diameter at the Clamp location of 2'-1". Use one clamp per cable.
2. Install a properly sized Weather Head, fastened securely to the standard pipe for each pole location. All locations other than the wire entrance, the Weather Head face is to be left closed to outside atmosphere. Wire entrance installed per Index 634-001.
3. Any combination of Option 'a' or 'b' may be used provided both lifting and wiring is accommodated.
