CONDUIT GENERAL NOTES:

1. Furnish and install approved Conduits, Fittings and Embedded Junction Boxes (EJBs) in accordance with Specification Sections 630 and 635, this Standard, the National Electric Code (NEC) and as directed by the Engineer.

2. Furnish and install Embedded Junction Boxes (EJB) with weatherproof covers sized in accordance with NEC requirements and the maximum size limits shown. Install EJB adjacent to the Begin and End of Bridges, Begin and End of Retaining Walls, (except omit EJB adjacent to the Bridge unless a precast Traffic Railing with junction slab is used), and at other locations as necessary to maintain 300 foot maximum spacing. See Plans for additional locations and details.

3. For Conduit not designated for future use, see Plans for details. For Conduit designated for future use, stub out and cap the Conduit. Drive a 3'-0" long 3/8 (min) diameter Steel Pipe flush with the ground line adjacent to the end of the Conduit as shown on Sheds 2, 3 or 4. Provide the location of the stub out with Steel Pipe to the Engineer for inclusion on the As-Built Plans.

4. Shift vertical Railing reinforcement symmetrically to provide 2" clearance to EJB. Space shifted vertical reinforcement at minimum 3" centers. Cut horizontal Railing reinforcement to provide 2" clearance to EJB and provide supplemental reinforcement as shown. To facilitate placement of Conduit, Expansion Fittings, and Expansion/Deflection Fittings, shift reinforcing a maximum of 1" but do not cut railing reinforcing to facilitate Conduit or Fittings. Do not bundle Conduits, or Conduit and horizontal reinforcement.

GENERAL

EJB "A"
Double or Triple Conduit (Maximum Dimensions)

EJB "B"
Single Conduit (Maximum Dimensions)

* Reduce to 6" maximum when installed in Pedestrian / Bicycle Railings.
**EJB "B" Detail**

- Traffic Railing (36' Single-Slope)
- Deck Expansion Joint or 6" Open Joint in Railing
- 3 - 2" Ø PVC Conduits

See Detail "A" or "B" as required by Structures Plans

**Section Thru Traffic Railing at EJB**

- Traffic Railing (36' Single-Slope Shown, 42' Single-Slope Similar)
- Gutter Line
- Pedestrian/Bicycle Railing

**Section Thru Pedestrian/Bicycle Railing at EJB**

- Traffic Railing (42' Vertical Shape Shown, 32' Vertical Shape Similar)
- Gutter Line
- Pedestrian/Bicycle Railing

**Partial Elev. View Along Bridge**

- Top of Coping
- Bridge Deck
- Traffic Railing

**Partial Plan View Along Bridge**

- Gutter Line
- Bridge Deck
- Traffic Railing

**Partial Plan View Along Approach Slab Without Continuing Traffic Railing**

- Traffic Railing
- Bridge Deck
- Approach Slab

**Partial Elevation View Along Bridge**

- Top of Coping
- Bridge Deck
- Traffic Railing

**Bridge and Approach Slab with Edge Railing**

- Traffic Railing
- Bridge Deck or Approach Slab

**Notes:**

- 36' Single-Slope Traffic Railing shown, other Traffic Railings and Pedestrian/Bicycle Railings similar.
- EJB "A" shown, EJB "B" similar. See EJB "B" Detail.

CONDUIT STUB-OUT DETAIL

Median Traffic Railing (See Note 4)

SECTION A-A

NOTES:
1. Work this sheet with Index 521-426.
2. Adjust Conduit horizontally and vertically as necessary to align with EJB "B".
3. When installed in traffic face of a railing, use EJB "B" with a minimum 1/8" thick galvanized steel cover.
4. Set EJB such that, with gasket and cover plate secured and in place, cover plate is flush with the railing face. Flush is 1/2" to 1/4" measured with a horizontal straightedge.
