STANDARD PLANS INSTRUCTIONS
FY 2019-20 REVISIONS LOG

Standard Plans Index	*Description*
102–200	*Corrected AASHTO Table reference (3.8.1.1.2.3a–1 should be 3.8.1.2.3a1). Updated wind pressure coefficients to 8th Edition.*
400–289	*Deleted roadway plan set – must be in Structures set only.* *Added commentary –to clarify where to look for more details on quantities in the plan set (SDM & FDM).*
450–010	*Added note that beam camber in examples (graphs) may not meet SDG camber requirements*
455–400	*Added Section Modulus and prestress after losses (deleted same from Index)*
455–440	*Added Section Modulus and prestress after losses(deleted same from Index)*
521–001	*Updated language for usage of shoulder barrier and median barrier.*
521–010	*NEW*
521–422	*Design Assumptions and Limitations: changed to allow three conduits.*
521–423	*Design Assumptions and Limitations: changed to allow three conduits.*
521–426	*Design Assumptions and Limitations: changed to allow three conduits.*
521–509	*Design Assumptions and Limitations: changed to allow three conduits and added slip forming information.*
521–510	*Design Assumptions and Limitations: changed to allow three conduits and added information on slip forming.*
521–513	*Added slip forming information.*
521–514	*Added slip forming information.*
521–515	*Added slip forming information.*
521–660	*Design Assumptions and Limitations: Clarified anchor bolt requirements and pedestal loads.*
522–001 & 522–002	*Updated Title and Added sentence to preempt the bulleted list under 'Design Assumptions and Limitations'.*
522–003	*NEW*
534–200	*Alternate Technical Proposals: Added information/requirements.*
536–001	*Updated to provide guidance to extend guardrail 25 downstream if hazard. Clarified tapers in Approach Transitions. Clarified Alignment Curb payment.*
544–001	*Updated design guidance and payment to reflect new policy on Length of Need determination.*
546–010	*Updated 'Usage Criteria' to refer to FDM. Changed Plan Content Requirements to reference FDM 325.*

STANDARD PLANS INSTRUCTIONS
FY 2019-20 REVISIONS LOG

Standard Plans Index	*Description*
641–010	*Added foundation design information.*
641–020	*Clarified foundation design guidance.*
649–010	*Updated Plan Content Requirements and Added "Factored Flexural Resistance" Table.*
649–030	*Design Assumptions and Limitations: Clarified how to measure vertical clearance (align with FDM 210.10.3). Updated cell and example of Data Table (deleted notes 3 & 4). Table of 50 foot Mast Arm Combinations, Arm 1 50 Arm 2 50 (all) Changed Pole from P3 to P4.*
700–020	*Clarified post weight criteria.*
700–030	*Changed Title and Deleted max. chord depth requirement.*
700–120	*NEW*
711–002	*Corrected Pay Items.*
715–010	*Clarified design assumption for max. fill height.*
