GENERAL NOTES

1. Treatment I:
   If trenching under sod is necessary to achieve the required Drop-Off, excavated topsoil is
   to be used for filling voids and low areas at the edge of pavement or for flushing along the
   edge of sod. Excess material to be uniformly distributed over the shoulder.

2. Treatment II:
   A. Borrow must meet the requirements for a “Select” material in accordance with Index 120-001
      and Specification 120.
   B. Borrow may be used in lieu of excavated turf and topsoil when economically feasible. There
      will be no additional payment for substituting borrow for excavated turf and topsoil.

3. Special attention is to be directed at achieving the required Drop-Off at the edge of pavement,
   within the dimension range shown.

4. Activities such as clearing, grading, and excavating that will disturb one or more acres of land
   require coverage under the General Permit for Stormwater Discharge from Large and Small
   Construction Activities from the Florida Department of Environmental Protection, and
   implementation of appropriate pollution prevention measures to minimize erosion and sedimentation
   and properly manage stormwater.

5. Turf Establishment:
   A. Wildflowers destroyed by shoulder sodding and turf operations are to be reestablished under
      the seeding rates prescribed for permanent wildflower #3 Group shown by table on Index 570-001.
   B. Establish turf in accordance with Specification 570.
