

**GENERAL NOTES:**

1. Work these Index drawings with the Strain Pole Schedule in the Plans.
2. Shop Drawings: This Index is considered fully detailed and no shop drawings are necessary. Submit shop drawings for minor modifications not detailed in the plans.
3. Materials:
  - A. Concrete: Class V Special or Class VI
  - B. Prestress Strands & Spiral Reinforcing: Specification 641
  - C. Hand and coupler cover plates: Non-corrosive material
  - D. Screws: Round headed, chrome plated
4. Fabrication:
  - A. Pole Taper for pole width, strands, reinforcing and void: 0.081 in/ft per face.
  - B. Concrete Cover: 1" minimum
  - C. Spiral Reinforcing: As shown, plus one turn for splices and two turns at both the tip and butt ends of the pole.
  - D. The design dimensions for Front Face (FF) and Back Face (BF) of the poles may vary transversely from the section shown by  $\pm \frac{1}{4}$ " to assist with removal from forms. Balance addition and subtraction of the face widths to maintain section areas shown.
  - E. Tie ground wires to the interior of reinforcing steel to prevent displacement during concreting operations.
  - F. Cut the tip end of the prestressed strand first or simultaneously with the butt end.
  - G. Provide cover plates and screws for hand hole and couplers. Attach cover plates to the poles using lead anchors or embedded threaded inserts.
  - H. Provide Aluminum Identification Tags on the poles with the following information:
    - a. Financial Project ID.
    - b. Pole Manufacturer
    - c. Standard Pole Type Number
    - d. Pole Length (L)
5. Support locations are for strand release, storage, lifting and transport. Keep BF oriented downward until final erection.
6. Pick-up and support locations shown may vary within a tolerance of  $\pm 3$ ".
7. Two point attachment: provide an eye bolt hole for the messenger wire.
8. Tether Wire: When required, field-drill the eyebolt hole prior to installation
