# **Index 460-250 Series Access Hatch Assembly**

### **Design Criteria**

AASHTO LRFD Bridge Design Specifications; Structures Design Guidelines (SDG); Structures Detailing Manual (SDM)

### **Design Assumptions and Limitations**

The Access Hatch Assembly series includes Index 460-250 for use with steel box sections and Index 460-251 for use with concrete box sections.

Use Index 460-250 in accordance with the requirements of **SDG** 5.6 for steel box sections and Index 460-251 in accordance with the requirements of the **SDG** 4.6 for concrete box sections.

The Designer shall analyze access opening sizes and their locations along the bottom flange for structural effects on the girder.

#### **Plan Content Requirements**

Locate Access Hatch Assembly locations on framing plans or segment layout sheets and include a cross reference to **Standard Plans** Index 460-250 or 460-251 as appropriate.

## **Payment**

The cost of Access Hatch Assemblies is incidental to the cost of the box girders they are used with. No separate payment is made.
