GENERAL NOTES:

1. Work this Index with Index 425-001 and Index 425-010.

2. Conform the finished grade and slope of the inlet tops with the finished cross slope and grade of the proposed sidewalk and/or border.

3. For inlets constructed on a curve, refer to the plans to determine the radius. Bend steel when necessary.

4. Use Grade 60 reinforcing bars with 1¼" minimum cover unless otherwise shown, see Sheet 6 for equivalent area Welded Wire Reinforcement details.

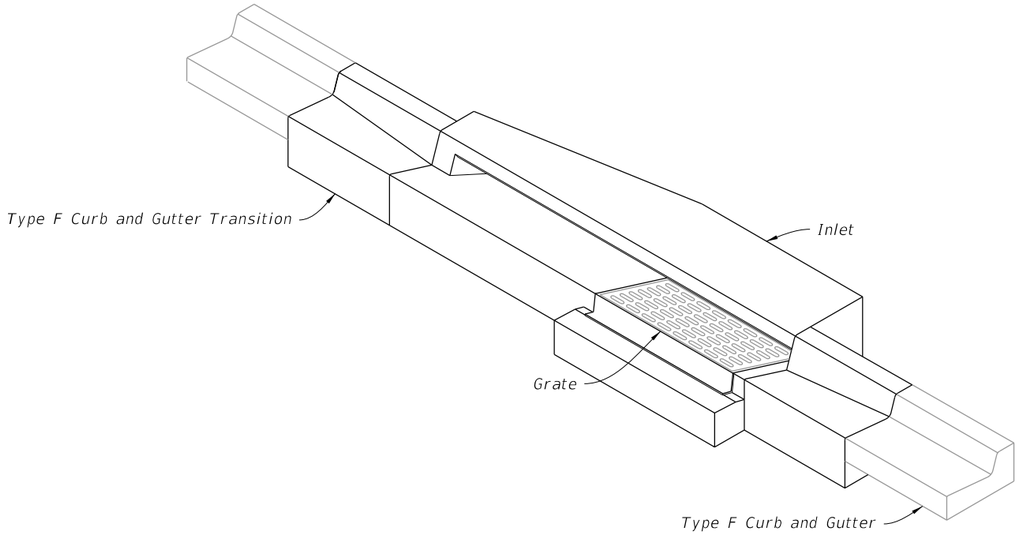
5. Inlet tops may be either cast-in-place or precast concrete. Conform precast units to the dimensions shown or in accordance with approved shop drawings.

6. Corner fillets are required at inlet opening for precast units or C-I-P units used in conjunction with circular inlet bottoms or skewed rectangular inlet boxes. Finish top of fillets flush with drain throat bottom and match slope.

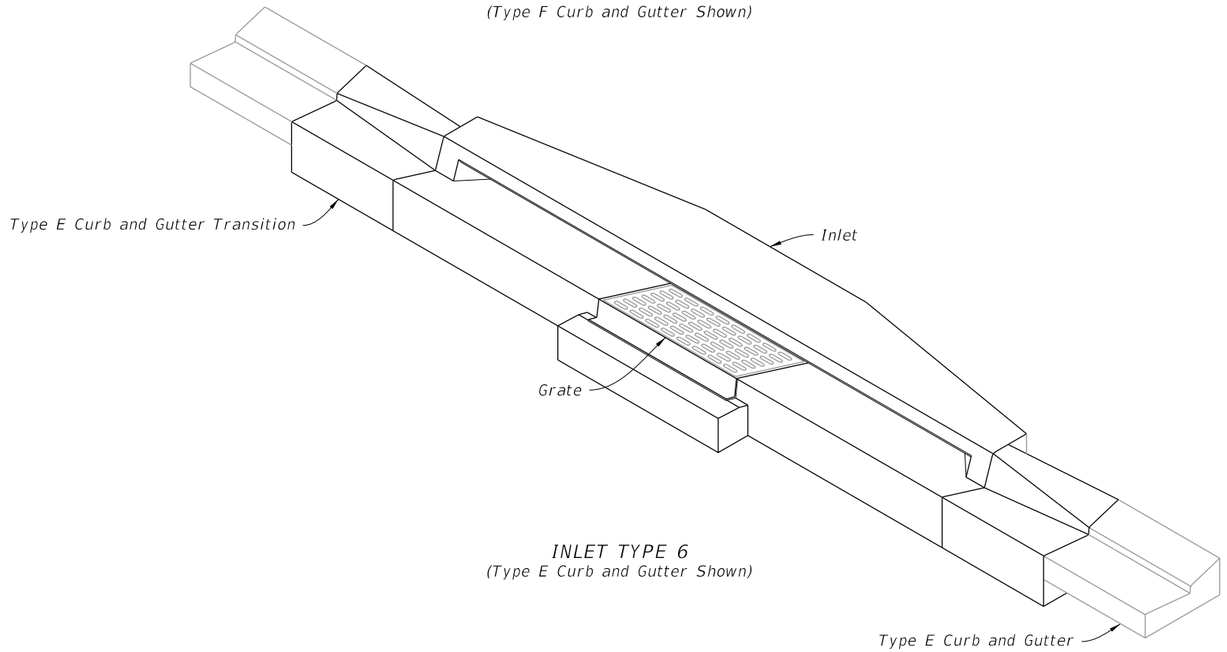
7. For Type E curb and gutter, transition the shape of the curb over the gutter transition length to match the face of the inlet (Type Ft).

8. Meet the requirements of ASTM A36/A36M with steel used for frames and grates.

9. Use either cast iron grates or steel grates.



INLET TYPE 5
(Type F Curb and Gutter Shown)



INLET TYPE 6
(Type E Curb and Gutter Shown)

S	4	7	3'-2"	7	3'-2"

NOTES:

1. All bar dimensions in the bending diagrams are out to out.
2. Bars 4A and 4E may be combined into a single bar.
3. Welded Wire Reinforcement consists of smooth or deformed wire meeting the requirements of Specification 931.
