# **Index 660-001 Vehicle Loop Installation**

## **Design Criteria**

FDOT Design Manual (FDM); FDOT Traffic Monitoring Handbook (TMH), FHWA Traffic Detector Handbook: 3<sup>rd</sup> Ed. Vol.2 (TDH)

### **Design Assumptions and Limitations**

When applicable it is acceptable to use existing loop and traffic pull box nearest the existing controller to connect new conduit runs and loop lead-ins into existing assembly.

#### **Plan Content Requirements**

In the Signalization Plans:

For each loop include callouts for type (A - F) and location.

In the Intelligent Transportation Systems Plans:

For each loop, include callouts for location.

Include in the General Notes Sheet special design information about loop installations that are not covered in the *Specifications*, such as Loop Details and Detail of Loop Winding.

### **Payment**

Item number	Item Description	Unit Measure
660-1-ABB	Inductive Loop Detector	EA
660-2-ABB	Loop Assembly	AS

See the **BOE** and **Specification 660** for additional information on payment, pay item use and compensation.

# **Examples**
