

**STANDARD PLANS INSTRUCTIONS  
FY 2026-27 REVISIONS LOG**

<i>Standard Plans Index</i>	<i>Description</i>
400-510	<i>Updated old Index reference numbers to the current system.</i>
440-Series	<i>Added "and Guidance" to the overarching design references for the SPI; Clarify length of Type V Underdrains are based off applicable recovery requirements; Removed reference to Type V standard fine aggregate conformance to Chapter 62-25, FAC; Updated name from "detention basins" to "detention with filtration stormwater management systems"; Added "inspection" in front of "boxes detailed in Index 440-002".</i>
450-450	<i>Updated Figure 12 to increase the shear modulus of the bearing pads.</i>
520-001	<i>Added a sentence to define which standardized options result in a "curbed" roadway as the term is used and defined by FDM 215 and FDM 210.5 (which references Index 520-001).</i>
536-001	<p><i>Part A. (General): Given the removal of TL-2 guardrail, added note to explain compatibility between General TL-3 guardrail and other segments with differing test levels.</i></p> <p><i>Part C. (End Treatments): Added explanation for how to handle trailing end treatment placement when conditions are constrained.</i></p> <p><i>Part F. (Rub Rail): Changed wording to acknowledge new policy for motorcycle usage that has been added to FDM 215.4 in this revision cycle.</i></p> <p><i>Part H. (Modified Mounts): Added clarification for the intended use of special steel posts, with a limitation on consecutive posts.</i></p> <p><i>Part N. (Slope Guards): Added additional clarification to remind that Slope Guards and drop-offs require shielding per Length of Need processes defined in Part B and FDM 215. Also, removed TL-2 for table entry option since TL-2 guardrail is being removed from 536-001 in general.</i></p> <p><i>Plans Content Requirements:</i></p> <p><i>Part C. (Roadway Plan): Removed "Low Speed (TL-2)" callout option since TL-2 guardrail is being removed from 536-001 in general.</i></p>
546-010	<i>Add clarification on rumble strip location.</i>

**STANDARD PLANS INSTRUCTIONS  
FY 2026-27 REVISIONS LOG**

<i>Standard Plans Index</i>	<i>Description</i>
548-020	<i>Changed the various references used to discuss the high water elevation as it pertains to DHW - Design High Water.</i>
550-001	<i>Added direction about fully detailing any Farm Fence that is different in height or installation details. Also added language about specifying use of aluminum post, braces, and accessory framing hardware along with non-commercial gates in the Plans for Type A Farm Fence.</i>
570-010	<i>Removed language regarding Treatments I and II. Added note about wildflowers that was previously in the index. Added language to the limitations for palletized vs rolled sod.</i>
641-010	<i>Adding language to clarify the minimum pole embeds are minimums not actual and they must be designed.</i>
700-020	<i>Updated language about columns under Plan Content Reqs</i>
700-040	<i>Page 2: Editorial correction - Back Rake is two words.</i>
711-001 through 711-003	<i>Added missing pay items to table. Added design guidance.</i>
