

## NOTES:

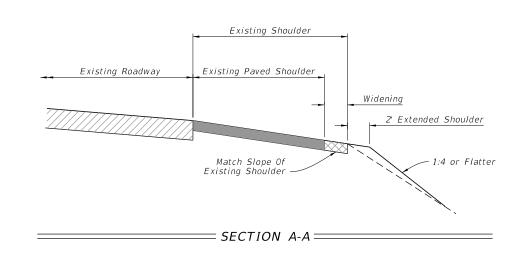

- 1. X = Work Zone Sign Distance, see Index 102-600 for "X" value.
- 2. Use mitered end sections for any end sections within the clear zone.
- 3. Match cross slope of existing shoulder for widening.
- 4. Provide 2' of unpaved shoulder outside of the widening.
- 5. No more than two (2) access openings will be allowed on each project.
- 6. Do not vary from the plan detail without approval of the Engineer.
