Index 591-001 Landscape Irrigation Sleeves

Design Criteria

Florida Department of Transportation, Design Manual Chapter 228, Chapter 329; Florida Department of Transportation, Standard Plans, Index 630-001; Florida Department of Transportation, Standard Specifications for Road and Bridge Construction, Section 630 (Conduit) and Index 591-001 (Landscape Irrigation Sleeves).

Topic No. 625-010-003

FY 2026-27

Design Assumptions and Limitations

Follow the Developmental Standard Plans Process outlined in *FDM 115*.

Pavement, base, concrete curb and gutter, concrete sidewalk, landscape, irrigation meter, backflow prevention, wells / pumps, and irrigation system components are not included with **591-001**.

Three typical conditions are applicable for use of the Landscape Irrigation Sleeves, they are:

- Roadway with Utility Strip,
- Roadway without Utility Strip, and
- Roadway Medians

Other conditions may exist that are not covered by *Index 591-001*. For Landscape Irrigation Sleeve installations beneath existing roadways, see *Standard Plans, Index 630-001*.

Plan Content Requirements

Insert *Development Standard Plans, Index D591-001*, received from the Central Office monitor, into the appropriate component plan set in accordance with *FDM 901*.

Provide plan sheet locations for Landscape Irrigation Sleeves as part of the appropriate component plan set. Provide Landscape Irrigation Sleeve diameter size if greater than the minimum specified in *Index D591-001*.

Payment

Item number	Item Description	Unit Measure
591	Irrigation Sleeve	LF

See the **BOE** and **Specification 591** for additional information on payment, pay item use, and compensation.
