NOTES:
1. U = Buffer Length, X = Work Zone Sign Spacing. See Index 102-000 for "U," "X" and channelizing device spacing values.
2. Optionally, use "Flagger Ahead" sign with symbol (W20-7) instead of "Flagger Ahead" sign with text (W20-7A).
3. Use temporary raised rumble strips in accordance with the Plans. If temporary raised rumble strips are not used, omit "Rumble Strips Ahead" sign (MST-18-10) and associated work zone sign spacing distance. See Index 102-000 for temporary raised rumble strip details.
4. The "Speeding Fines Doubled When Workers Present" sign (MOT-13-06) and "End Road Work" sign (G20-2), along with associated work zone signs spacing distance, may be omitted when the work zone will be in place for 24 hours or less.
5. Flaggers on each approach to the roundabout should coordinate with each other so that traffic may proceed through the roundabout from only one entry point at any one time.

SYMBOLS:
- Work Area
- Channelizing Device (See Index 102-000)
- Work Zone Sign
- Type III Barricade
- Lane Identification and Direction of Traffic
- Flagger

Use Sign Sequence Similar to Eastbound Approach
Temporary Raised Rumble Strip Set (See Note 3)
Use Sign Sequence Similar to Eastbound Approach
