COMMENTARY

Sheet 1: Updated Note 1 for Concrete Barrier and bridge mount. Provided additional wiring detail, a reference to 715-002, and new information of where breakaway fuse holders fit inside of pole.

Added callout and new Note 3 to explain that the top of the concrete foundation is flush with the finish grade elevation on the side nearest to traffic lane. Added vertical tolerance.

Added clarifications due to industry feedback.

COMMENTS AND RESPONSES

COMMENT: Consider an optional round design of the slab to reduce concrete, improve aesthetics and increase green space.

RESPONSE: This comment is beyond the scope of the current revision proposals for 2021-22, so we'll log it for consideration in future publications.
