COMMENTARY

The 700 Index Series is being edited to remove material information and other information that is located in the Standard Specifications. Revisions are being made to Specification Sections 700, 962 and 965 in conjunction with these changes.

COMMENTS AND RESPONSES

BLACK = Industry Review Comments **RED** = Standard Plans Response **GREEN** = Change Made to Index

Name: Matthew Murdock

COMMENT: Is the foundation table missing from Index 700-010?

RESPONSE: The foundation table referenced is found on Sheet 3. This table has not changed and is not included in the review package. Note 1 on Sheet 4 will be revised to clarify the location of the table.

Change made to Index: Changed Note 1 on Sheet 4.

COMMENT: – Is there a maximum width intended for single column ground signs? If so, can this be shown somewhere in this Index? This has come up on some of our projects recently and would be helpful to be able to find a specified maximum width.

RESPONSE: Yes, it is stated in the notes on Sheet 2. “Do not exceed an area of 30 SF or a width of 60 inches for a sign or a sign cluster.”

No change made to Index:
